THE CHARLEROI MAIL

Entered second class mail at Charleroi, June 15, 1900, according to Act of Congress of March 8 1879

VOL. X. NO. 201. CHARLEROI, WASHINGTON CO., PA., WEDNESDAY, APRIL 13, 1910. One Cent.

COMMITTEES APPOINTED TO CELEBRATE FOURTH

FIREWORKS DISPLAY WILL BE ONE OF THE BIG FEATURES

Aeroplane Exhibition Being Planned for and if Possible Machine of Latest Model Will be Secured for Flights.

COMMITTEES WILL MEET

Charleroi will observe the Glorious Fourth in a manner befitting the standing and dignity of the Magic City. The meeting held in the borough building last night to take action on the proposed Fourth of July celebration was one of the largest and most enthusiastic ever held in this town. Burgess G. W. Risbeck called the meeting to order, and explained that it was by the action taken by the borough council at their last meeting that he had called the people together in order that committees might be appointed for a proposed celebration to be held here July 4. He then appointed J. D. Berryman as chairman and E. W. Hastings secretary.

Captain J. K. Hein, president of council, was called on for remarks, and he stated that council was the prime mover of the proposed celebration, and that the members were ready and willing to help in any way they could to make the day a grand success. T. J. Allen, J. J. Hott and several others gave their opinions as what should be done to make the day one long to be remembered, and committees were appointed with instructions to get busy. There will be another meeting next Tuesday evening at 7:30 in the borough building to hear the reports of all committees, which are as follows:

Finance—R. H. Rush, K. W. Daly, E. W. Hastings, W. R. Gaut, Geo. W. Risbeck.

Printing—J. W. McKean, Edgar R. Abell, C. M. Wertz, Earl Piper.

Entertainment and Sports—J. J. Hott, Fred Cleribue, D. R. Hormell, G. F. Rylands, J. K. Rickey, Geo. W. Might, H. L. Swickey.

Parade—John Majors, Chas. Wallgren, J. K. Hein, W. H. Calvert, Chas. O. Frye, Frank Riva.

Music—Wm. Kirk, R. W. Brown, D. R. Duvall, J. W. Carroll, George Myford.

Decorating—J. E. Masters, F. B. Burwell, John D. Berryman, Louis Beigel, Eugene Fau, C. W. Weltner, Geo. L. West, D. H. Johnston.

Invitation and Reception—Prof. J. G. Pentz, Rev. C. E. Frontz, Theo. J. Allen, J. K. Tener, Rev. G. G. Kerr, J. K. Johnston.

Fireworks—Richard A. Roberts, Harry C. Hormell, John M. Fleming, C. M. Malcolm, Louis Collins.

Executive—J. J. Hott, S. C. Todd, G. W. Risbeck.

While no details were arranged at the meeting a proposition to have as the chief feature of attraction an aeroplane ascension met with unanimous approval.

Monessen Hustling.

Through the efforts of the board of trade Monessen has succeeded in inducing the P. and L. E. railroad to add two trains a day to the local service. This is expected to help the out of town trade of the steel town very materially.

CANTATA WILL BE GIVEN TO RAISE MONEY FOR OUTING

To raise funds to defray the expenses of the annual school children's outing and picnic this year a cantata, "The Queen of the May," will be held at School Hall two nights during the early part of May. The cantata will be produced under the direction of Prof. I. T. Daniel, supervisor of music in the Charleroi schools. There will be about 100 children participate, all in costume. The music to the cantata, written by W. Otto Meissner, is pretty and catchy, and the words by Ida B. Helphenstine are suitable. The cantata will last about an hour and a half.

CANTATA TO BE RENDERED

The sacred cantata, "Bethany," libretto by Wm. ApMadoc, music by W. Rhys-Herbert, Mus. Doc., will be sung by the choir of the First Presbyterian church of Charleroi next Sunday evening, under the direction of Prof. I. T. Daniel, commencing promptly at 7:30 o'clock.

As the title of the work would indicate, "Bethany," the simple and sweet home of Lazarus and his sisters, Mary and Martha, wherein Jesus, "The Homeless One," often found rest and comfort, and where some of the wondrous deeds of the Master took place, are the scenes in this work.

The first part of the cantata deals with the visit of the disciples from Jerusalem, who pay tribute to the quiet and renowned village as they approach it; who, when in the presence of the Master, seek His words of truth and wisdom, are received lovingly, are taught the parable of the Good Shepherd, and of the departure of Jesus to the night shades of the hills, where He prays and communes with His Father.

The second part opens with the news brought to Jesus of Lazarus' sickness and death, the sorrow and lamentation at the Bethany home, the coming of Jesus to awake him, the dialogue with Martha concerning the resurrection, the raising of Lazarus, the rejoicing over the miracle, the departure of Jesus again to the hills. His hour drawing nigh, the disciples' forebodings of trouble befalling their Master and their final rejoicing in the hope that the kingdom of love, truth and righteousness would soon be established upon the earth.

The solo parts will be assumed by Mrs. I. T. Daniel, soprano; Miss Helen Woodhall, contralto; Morris J. Stephens, the noted voice teacher of Pittsburg, tenor, and Prof. I. T. Daniel, bass and director. Mrs. W. C. Fishburn will preside at the piano, with Miss Leila Orange at the organ.

Wants Old Chair.

Congressman John K. Tener, past exalted ruler of the B. P. O. E., is deeply interested in securing for the National Museum of the Grand Lodge of Elks, a chair now owned by George B. Lloyd, of Indian Head, near Washington. The chair is composed of the horns, hoofs and hide of an elk and was once owned by Abraham Lincoln. It was in fact used as a part of the furnishings of the White House during Lincoln's Presidency.

TAKING TESTIMONY TODAY IN ECLIPSE MINE MATTER

Special Danger Said to be Envolved in Gas which Has Been Found to Exist at Frequent Intervals in Mine.

The commission appointed by the court (Richard Maze, R. N. Pollock and Joseph Gallagher) to examne the Eclipse mine, south of Elco, of the Monongahela River Consolidated Coal and Coke company and report the conditions as they are or have been, together with the facts in the case, to the court within 30 days are at the Wilbur hotel taking testiomny in the case from the officers of the mine, the mine inspectors and miners, who convened with the Coal company, in trying to prevent the use of safety lamps on pillar work of the above named mine.

The history of the case is as follows: The inspector of the district, F. W. Cunningham, inspected the mine in November, 1909, and recommended the use of safety lamps on pillar work, and the superintendent wrote to the inspector and said that he would order the lamps and put them in the mine on this class of work. On the second inspection of the mine in March, 1910, the inspector found that the lamps had not been introduced in the pillar work and he again notified the superintendent, Wm. Minford, to adopt their use on this kind of work which he refuses to do.

The inspector communicated with the Chief of the Department of Mines in Harrisburg, who appointed inspectors Alexander McCauch of Monongahela, J. F. Bell of Dravosburg, C. P. McGregor of Braddock, Arthur Neale of Crafton and John I. Pratt of Pittsburg to examine the mine and proceed according to the mine laws. They examined the mine and considered that, to work pillar work with open light there was immediate danger from the overlying strata subsiding, or other cause that may bring in a sudden inflow of gas that may cause an explosion. The superintendent was then notified to remove such danger by excluding open lights on pillar work, which they negleted to do. The inspectors appealed to the court for an injunction restraining the operation of the mine until the said danger was removed.

The mine is now closed down and by the order of the court it will remain closed until the question involved between the inspectors and the coal company is settled. The coal company told the court that they could not get the miners to use the safety lamps. The law regulates questions of this character. The commission has up to this time spent two days in the mine and it will take about two days yet before they finish their examination.

After all is said it is a matter of law. The mine records show that gas has been found at frequent intervals and it cannot be said that it will not be so again on pillar work, and this kind of work involves a special danger that the mine law contemplates when it says in Article 5, Section 5, in part of "Pillar workings and other working places in any mine where a sudden inflow of said explosive gas is likely to be enountered, by reason of the subsidence of the overlying strata or from other causes, shall be worked exclusively with locked lamps." The miners contend that there is only 20 to 25 feet of cover on the mine and there is no danger from gas. This is the case of the outcrop line which the mine has not yet reached with pillar work where the mine croses a ravine there is little cover. In this part of the mine there is no pillar work.

CENSUS MAN BEGINS WORK NEXT FRIDAY

The census begins April 15 and must be completed in thirty days.

The enumerators will wear a badge inscribed "United States Census, 1910."

The law requires every adult person to furnish the prescribed information, but also provides that it shall be treated confidentially, so that no injury can come to any person from answering the questions.

The Census Bureau, prior to April 15, will distribute to every farm owner and tenant in this State a blank or schedule containing the Census questions relative to farm operations and equipment. This should be filled up, if possible not later than the morning of April 15, but if anyone has been unable to fill it up by that time, he should do it as soon afterwards as he can.

People who do not speak English or who do not understand the schedule completely should get help from others, if possible, in filling it up.

The President has issued a proclamation, calling on all citizens to cooperate with the Census and assuring them that it has nothing to do with taxation, army or jury service, compulsory school attendance, regulation of immigration, or enforcement of any law, and that no one can be injured by answering the inquiries.

It is of the utmost importance that the farm census of this State be complete and correct.

Therefore every farm owner and tenant should promptly, fully and accurately fill up the "Advance Farm Schedule" and carefully preserve it for the enumerator when he calls.

Miss Bradley of Pittsburg, who has been here the past few days visiting friend, returned to her home today.

THREE ARE HURT IN A COLLISION

When a Fairhaven car northbound and a Charleroi car southbound came together in a head-on collision between Elwyn and Cooley, near Castle Shannon, last night at 8 o'clock three men were injured and the cars were somewhat mashed.

THE INJURED.

Motorman Glen Anderson of the Fairhaven car, right leg bruised and sprained.

Conductor Arthur Hayes of the same car, nose broken and hurt about the head.

Track Foreman John Fisher of Finleyville, who was riding on platform of Fairhaven car, right leg bruised.

The cars were running at a fair rate of speed when the collision occurred. The Fairhaven car, being the lighter, was pretty badly wrecked as far as the cab was concerned, the cab of the larger Charleroi car being less seriously damaged. There were no passengers on the Fairhaven car and everyone on the Charleroi car escaped injury.

Removing Plumbing Shop.

J. M. Fleming is moving his plumbing shop and store today from his old location in the Masonic building, where he has been for several years, to his own building, 427 Fallowfield avenue, in the store room formerly occupied by McDermott's Creamery Products company. Mr. Fleming will have more commodious quarters, and expect to be able to better serve his increasing trade. He has several important plumbing contracts at the present time.

J. M. Fleming is removing his plumbing shop and store to his own building, 426 Fallowfield avenue.

REMONSTRANCE TO ACTION OF TRUSTEES FILED BY MEMBERS

Through their attorney, D. M. McCloskey, Esq., a number of the members of St. James A. M. E. church of Charleroi have filed a remonstrance to the incorporation of the church, as proposed by the trustees, through their attorney, W. N. Butler. The application for a charter has been filed and the remonstrance was just entered yesterday. It is claimed that the action to apply for incorporation was taken with undue authority and without church action.

Mrs. L. Collins is spending the day in Pittsburg.

RESULTS ANNOUNCED

A joint conference between the coal operators and miners of Pittsburg District No. 5 United Mine Workers met in Pittsburg this morning, where the miners' district conference is in session with a view of reaching some agreement on a wage scale. At yesterday's session of the convention a committee was appointed to act with the officers as a scale committee. The miners entertain strong hopes that a settlement will be reached.

The result of the official vote for district officers was announced yesterday; Francis Feehan, re-elected president by a good majority over. S. A. Whetzel; Van Bittner, vice president; Timothy Donovan, secretary and treaurer; George Dagger, international board member; William Dinnin, auditor and William Hargest, William Brewer and Michael Marracini tellers. The board members from the various districts were chosen as follows: Thomas Sheehan, first; Otto Slater, second; S. A. Laverik, third; George Bolton, fourth; Michael Halapy, fifth, and William McKay, sixth.

The scale committee to meet the operators today is composed of S. A. Whetzel, T. P. Hanaway, James Miller, Hugh McLaughlin, Robert Garrity. The district officers also will take part in the conference.

WERE QUIETLY MARRIED IN PITTSBURG MONDAY

After having been quietly married in Pittsburg on Monday by Rev. Clayton A. Smucks, of the Smithfield Methodist Episcopal church, Jacob Sampson and bride, who was Miss Mary Emily Wilson, arrived in Charleroi last night, the bride's home. The couple will spend a few weeks here after which they will likely go to Youngstown, Ohio, to reside. The ceremony was performed at the parsonage at 5 o'clock, Monday, and the couple have been in Pittsburg ever since. The bride is the daughter of Mr. and Mrs. B. E. Wilson of Fallowfield avenue, and has a large acquaintanceship in Charleroi. The groom is a traveling salesman, and comes of a good family.

John McIlvaine went to Frankfort, Kentucky, today where he will play ball the coming season.

QUIT CLAIM DEED MUST BE SECURED OF COOPER HEIRS

Charleroi Land Co. Could Take the Necessary Steps to Free Property Owners From Troublesome Burdon

ANXIETY IS MANIFESTED

Since the attorneys for the Government discovered a flaw in the title of the properties to be taken over for the site of the Federal building on Fallowfield avenue and Seventh street, and their subsequent action to clear the same, more or less anxiety has been manifested by property holders in the borough whose holdings are similarly entailed. So far as known no other individual action has been taken to clear the tites of this defect, although there has been some talk of a joint movement on the part of as many property owners as could be interested for that purpose.

This lien was entered in 1839 against the property when it was owned by the late Valentine Cooper. Athough the property has changed hands several times since, the lien was never satisfied. When the property was purchased by the Charleroi Land company, all subsequent research of title apparently did not go back of this company's title, and it was taken for granted that the abstract was clear. It remained for the Government attorneys to discover differently. Now, before a clear title can be given in any transfer of the affected property, individual action will have to be taken to clear up the title.

The other day a Charleroi citizen in conversation with a prominent corporation attorney mentioned the circumstance, and the attorney stated that it was an easy proceeding to remove the lien. All that is necessary, he stated, is for the Charleroi Land company, by whom the lots were originally sold, to get a quit claim deed from the Cooper heirs which will satisfy the lien and clear up the titles of all the individual holdings. If this is the case it is thought that the Charleroi Land company will take this step to satisfy the old lien and make good all the titles they have given since their organization. It is probable that some sort of a movement will be instituted soon to clear up the whole property so that individual action will not become necessary, as this would entail a hardship on many of the small house-holders in the borough.

Social Well Attended.

A large crowd was in attendance at the social of the Lady Maccabees at the home of Mrs. Katharine Gray of McKean avenue last evening. Guests were present from Monongahela, Donora, Monessen and Belle Vernon, as well as from town, and music, games and an appetizing lunch were the features of entertainment. At a late hour all departed, after a delightful evening The next social will be at the home of Mrs. M. J. McGee of Fallowfield avenue, to which all are invited.

G. T. Barger left this morning for New Bethelehem, Clarion county, for a few days vist with his parents.

J. K. Tonor, Pres. S. A. Walton, Vice Pres. R. H. Rush, Cashier.

Eagle Will Scream.

The large and enthusiastic outpouring of citizens at the preliminary meeting at the borough building last night to take steps for a public observance of the Fourth of July here, insures the success of the project. It is now safe to assume that the Eagle will scream in a manner never before known in the upper Monongahela valley, and that Charleroi will again win laurels as a promoter of public undertakings. All the rest now is a matter of detail.

One of the proposed features of attraction, which marks the originality and progressiveness of Charleroi citizens, is the proposition to secure an aeroplane. This will be the first exhibition of the kind ever shown in the valley, and is one of the wonders of the age. Other attractions will be in proportion and it will be well for the outside public to keep an eye on Charleroi from this time until the dawn of the Glorious Fourth. The Eagle will certainly scream here that day.

Real Issues.

In view of the nomination of the Assemlymen and State Senators at the June primary, it will be wisdom on the part of the people to turn over in their minds some of the real State issues involved. Ordinarily political campaigns for Legislators hinge on political factional control. This time there is no special occasion for that, as no factional discord to speak of exists in the State. The finances are in excellent condition, the Commonwealth is virtually out of debt, and Governor Stuart's administration had been honest, clean and economical, and has the approval of friends and political foes alike.

Some of the real issues, however, that should be considered before the various candidates begin to canvass for the support of voters, is more appropriations for improved roads; a uniform system for sewage disposal, and State aid in constructing and maintaining the same, under certain conditions; more aid in promoting and maintaining the juvenile courts; a uniform system of weights and measures and State inspectors to enforce the same; increased aid in treating and stamping out tuberculosis, and many other matters that have a direct bearing upon the comfort and well being of the people in general.

If the people would pay attention to some of these issues instead of emotional appeals that have a personal bearing, better conditions would result. The issue that affects every man, woman and child every day in the year is the one that should command the support of the voters. That is the legislation that is needed now, and the people should see that those who aspire to the office of Assemblyman or Senator have the ability and dispositon to work along these lines.

A Matter of Enforcement.

A Pittsburg newspaper states that the Independent Brewing company of Pittsburg has decided to withdraw all the applications for county license of breweries under its control in that county, and make application for State license only. This will give them the privilege to sell only to licensed retail dealers, and will take away from them the privilege to sell directly to consumers in the county.

Presumably this action is based on the recent decisions of the various county courts—Washington in particular—in interpretating the license laws of the State in regard to the privileges of breweries and their agents in selling to consumers. The extension of this branch into every part of the county where breweries were located through agents had reached such proportions that the jurisdiction of the license court was virtually set aside. Gross excesses followed, and the people in general blamed the statutes for this evil. Investigation, however, proved that it was not the law that was to blame. It was the lack of enforcement that was responsible for the evils of indiscriminate peddling and selling of beer and other liquors.

Judge McIlvaine's interpretation of the law governing the sale of beer within a county by brewery agents has put the proper meaning and intent before the public This action has been followed by other county courts, and the indications are that this construction will be applied in every county throughout the State. By this it is seen that the license law does not grant brewery agents leave to become free lances in every community in the traffic of their product, and that the evils that have resulted from the indiscriminate sale is contrary to law. It exists only where the people tolerate it, but when the law is enforced the regulation is sufficient to protect unlicensed communities.

ELECTRIC SPARKS

To follow a crowd occasionally means to take part in a lynching bee.

The United States may have a population of 90,000,000. However, after waiting the past nine years to find out, we surely should not kick because we have to wait a few months more to learn the exact figures.

It's a hard question to decide which to believe when two reputable men make exactly the opposite statements.

When Pinchot and Roosevelt met there was an exchange of compliments. The people would like to know what followed that.

Nobody said our gas bills were inflated. What we said was that the gas company shouldn't charge us so much for the wind we use.

One of the compensations of being a milkman is that one may be able to see the comet.

Mrs. A—"Mrs. C. has three new hats." Mrs. B—"What does she want so many for? She never goes to church."

A woman went to buy a hat the other day, but when she got to the store she found that before she could think of getting a seasonable piece of headgear, she would have to buy about $15.00 worth of hair. Not having that much money she decided not to invest.

A very unfortunate girl lives in Atchison. She can't brag of her ancestors, for they lives in Atchison and Atchison people know how worthless they were. She can't boast of her kin, for they live in Atchison, and she can't brag of her future, because she is engaged to a cheap little man who has no future.—Atchison Globe.

Hi diddle diddle,
The cat played the fiddle,
The cow jumped over the moon;
And now you know why
That beef is so high,
So let's hope she'll come down
pretty soon.

One of the pleasures of having relatives poorer than yourself is that you can boast to them of new clothes and social pleasures, when you have any.

Members of council do not seem to admire the prospect of going over the tax exoneration list any more than we thought they would.

When it comes to managing about 160 players, about the total number who have been signed by teams in the church league, there is bound to be more friction than was caused by the upheaval in Congress.

MAKING A TUNNEL.

The Way Railroad Engineers Bore Through a Mountain.

Sometimes the construction engineer brings his new line face to face with a mountain too steep to be easily mounted, and then he prepares to pierce it. Tunnels are not pleasant to ride through. They are, moreover, fearfully expensive to construct, and they necessitate a double inspection. But—and the "but" in this case is a very large one—they reduce grades and distances in wholesale fashion, and so in a mountainous country the engineer must be prepared to drive tunnels and the folk who come after him to operate them. The tunnel job is apt to be a separate part of the work. It calls for its own expert talent.

If the tunnel is more than a half or three-quarters of a mile long it will probably be dug from a shaft or shafts as well as from its portals. In this way the work will not only be greatly hastened, but the shafts will continue in use after it is completed as vents for the discharge of engine smoke and gases from the tube.

The ordinary course of such work is by the use of cutting shields proceeding simultaneously from the portals and from the footings of the shafts. These shields are to be likened to steel rings of a circumference only slightly greater than that of the finished tunnel Men working on different levels of this shield with pick and with drill and dynamite constantly clear a path for it, whereupon it is pressed forward Tracks follow the cutting shield, and more locomotives, steam or electric, are used in removing the material. The use of electricity keeps the tunnel quite clear of gases and makes the safest light for the workers.

In rare cases the rock through which the tunnel is bored is strong enough to support itself. But in most cases the engineers prefer to line the bore with brick, as a rule, and this lining is set in place right in the path of the cutting shield. After long weeks and perhaps months of work the time comes when the different bores meet and the tunnel is a single underground tube from portal to portal.

It Gets the Criminals.

According to the Chinese method of criminal prosecution, a man is responsible for the crime he may have committed personally, but if he chooses to escape justice by running away from the place where the deed was committed then the remaining members of his immediate family are held and punished in lieu of the real culprit. This may seem a strange way of attracting the real criminal back to the scene of his crime, but it appeals to the religious side of the man's superstitious nature. According to their religion, the man who forsakes his parents when in peril will find his soul sailing around through hades without chart or compass for all eternity. In view of this, compliance with the law is very prompt, for John Chinaman does not care to take the desperate chance.

What the Jury Found.

Some years ago the body of a well dressed man was found in a field on the outskirts of an English town. There were no marks of violence, and it was doubtful whether death had occurred from natural causes or if the individual had committed suicide. In due course the body was identified and a gentleman who had been acquainted with the deceased was called upon to give evidence at the inquest Among other things, he stated that he had always considered him to be a man of marked idiosyncrasies, and his brain was continually excited by his irresistible fondness for chimeras of various kinds. The jury was evidently satisfied with his statement and immediately brought in a verdict that "death was caused by idiosyncrasies forming on the brain in consequence of excessive indulgence in chimeras," adding a rider that "it should be a warning to people to refrain from that and other intoxicating beverages."

THE "BREAK" IN THE GAME.

Baseball Almost as Much Psychological as Athletic.

Nearly every baseball game is won and lost on one play—a play that comes at the psychological instant. Among the players who do not study psychology the crucial moment is known as "the break," a phenomenon which no one has analyzed and which the players themselves do not understand. Twenty men on the bench are watching closely and intently every move of the pitcher, every swing of his arm The tide of battle rises, ebbs and then suddenly at the start of some inning something happens. What it is no one outside the psychic sphere of influence ever will understand, but the silent, tight lipped, watchful, alert fellows on the bench see something or feel something, and the mysterious "break" has come.

"One ball!" The players on the bench suddenly stiffen and prepare for action.

"Two balls!" Two players jump for bats and begin swinging them; the coachers, who have yelled only because it was their duty, suddenly begin raging, screaming and pawing the dirt, and the manager, who has appeared half asleep, makes a trumpet of his hands and leads his men, bawling loud orders and wild taunts.

The spectators do not understand anything has happened. Other batters have had two balls called many times and it looks the same to the spectator who is beyond the mysterious "break" sphere. In two more moments the players' bench is a madhouse, with twenty men shouting, screaming, ordering, moving. "Three balls!" and a madman rushes out to the "deck." "Four balls!" and the spectators join the players in the demonstration The madness is spreading Crack—a base hit, a bunt, a wild throw; another base hit, screams, shouts, imprecations, a roar of frantic applause, a final long fly. The manager reaches for his glove, spits into it and says quietly, "Four runs—we've got 'em." The "break" is over, and the players' bench is again the quietest part of the grounds The surge of enthusiasm, confidence and noise subsides and the game is won.

Baseball is almost as much psychological as athletic Why one team can beat a stronger one regularly and lose to a weaker with the same regularity why one batter can hit one pitcher and is helpless before another, why one pitcher is effective against a strong team and at the mercy of another that cannot bat half as hard, are psychological problems.—American Magazine.

A MISER'S END.

Meanness of M. Vandille and the Way He Hastened His Death.

M. Vandille was chief magistrate at Boulogne and by miserly habits left a fortune of $1,000,000. His usual diet was bread and milk. The bread cost very little, and after eating his loaf at home his habit was to become his own public milk inspector, whom as chief magistrate he had the right to appoint. And so, as he declared, to protect the inhabitants from being imposed upon by an inferior quality of milk he took his walk immediately after eating his loaf and demanded to taste the milk of every salesman he passed, thus saving himself from purchasing any. Misers are generally strong men—they have to be so in order to live a life of privation—but eventually Vandille, like other misers, was seized with illness, and the surgeons had to be called in in those days they bled their patients. The surgeon asked Vandile half a livre for the operation, but the magistrate ordered him at once out of his sight and sent for the apothecary. The apothecary refused to cut the price down, so Vandille sent for a poor barber, who undertook to open a vein for three sous a time.

"Aye, but," said this worthy economist, "how often, friend, will it be necessary to bleed me?"

"Three times."

"And what quantity of blood do you intend to take each time?"

"Eight ounces."

"Well, but why can't you take the whole twenty-four ounces at once? You want to make a job of me, you scoundrel! Here, sir; there are your three sous. Take the twenty-four ounces immediately." The barber was generous to obey. M. Vandille lost the twenty-four ounces of blood and died in a few days, leaving all his vast treasures to the king, whom he made his sole heir.—Strand Magazine.

The Oldest Bridge in Paris.

The Pont Notre Dame is the oldest bridge in Paris. It was first built in 1413 in the reign of Charles VI., but it was carried away, together with the houses which lined it, by ice floes when the frost broke in 1499. A new bridge was begun at once under the direction of Jean Joconde of Verona and was ready for traffic in 1507. On that bridge stood the famous picture shop of Gersaint, which had a sign board specially painted for it by Watteau.—Westminster Gazette.

Jolting Him.

Bashful Youth—Miss Bella, does—does your mother object to my coming here so much? Fair Charmer—Oh, I think not! I heard her telling papa the other evening that you merely came to pass away the time; you didn't mean anything serious.—London Tit-Bits.

The Division.

"What!" exclaimed Mrs. Flatleigh. "You don't mean to tell me you pay a girl $10 a week for cooking?"

"Oh, no!" replied Mrs. Urbanville. "We only pay her $2 a week for cooking. The other $8 is for staying."—Chicago News.

GET away from the idea

That buying clothes of unknown make is a good policy—

Be as good to yourself as you are to your stomach—

You wouldn't eat things you knew were not good for you, would you—then why would you buy clothes of unknown quality—

We make it a point to show the inside of a garment as well as the exterior—

No chance to risk here—we show you just what you are buying—

IT'S YOUR KIDNEYS

Don't Mistake the Cause of Your Troubles. A Charleroi Citizen Shows You How to Cure Them

Many people never suspect their kidneys. If suffering from a lame, weak or aching back they think that it is only a muscular weakness; when urinary trouble sets in they think it will soon correct itself. And so it is with all the other symptoms of kidney disorders. That is just where the danger lies. You must cure these troubles or they may lead to diabetes or Bright's disease. The best remedy to use is Doan's Kidney Pills. It cures all ills which are caused by weak or diseased kidneys. Charleroi people testify to permanent cures.

Mrs. W. L. Evans, 104 Lookout avenue, Charleroi, Pa., says: "Several years ago a member of my family complained of a dull pain in the small of the back and difficulty with the kidney secretions. Doan's Kidney Pills were used and proved so beneficial that when the person referred to recently began to suffer from kidney trouble again, Doan's Kidney Pills were immediately procured at Piper Bros.' Drug Store. They proved to be a specific for disorders of the kidneys. I highly recommend this excellent preparation to other kidney sufferers."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

Free Concert.

The Charleroi Italian Band will give a free concert on Saturday evening at 6 o'clock in front of Charleroi House. Music of a very high order will be rendered and you will miss a big treat by not hearing it. All come out. P. Locate, Leader. 199t3p

A meeting of the stockholders of the Charleroi Oil company, which was recently chartered and is operating in Ohio, was held at the Charleroi Savings and Trust company yesterday afternoon. Several out-of-town stockholders were present.

The Style Standard

The Emerson Shoe
HONEST ALL THROUGH

IN the 2-eyelet model for Spring and Summer is the standard of Shoe Fashion. We call your particular attention to the close-fitting uppers, which hug the insteps and sides of the foot, giving that neat appearance which always marks the carefully dressed man. An exclusive method of cutting the upper leather makes this perfect Oxford fit sure. But we can show you better by a personal demonstration. May we prove the fit, style and comfortable wearing quality of an Emerson to you?

IS GENIUS DEVISABLE?

By HARRIET COWLEY.

[Copyright, 1909, by American Press Association.]

Whoever is born with superior mental powers must pay a penalty. Such persons are not satisfied to work in a common field. They struggle for a higher one to which admittance is denied them until their fitness for it is recognized. And how many a "mute inglorious Milton" has lived and died without any such recognition while his untalented brother has won a high position! The same is often true of one who loves madly. The very intensity of his person robs him of his coolness. He frets and fumes while a rival unmoved by sentiment lays siege to the maiden and wins her by regular approaches.

When John Gregory went to college he expected to lead his fellow students as he had led his schoolmates and afterward to lead the world as he had led his university associates. The only other being he loved except himself was Bertha Avery, and he loved her far better than himself. It was Bertha who was accountable for her lover's self admiration. She recognized his superior endowments and called his attention to them. Therefore he believing that through them he would win and hold her love, came to set great store by them.

John was graduated at the head of his class. Not only this, but he was the college literary light of his time, editor of the university magazine and winner of all the prizes given for essays. Indeed, so marked was his success as a college scribbler that he determined to enter the field of literature. He was never quite sure that Bertha loved him—indeed, she had never told him that she did—and he did not expect to make the conquest of her heart till he could lay a laurel wreath at her feet.

John entered his chosen field encouraged by all. There was no doubt that he had very superior literary faculties. He entered the editorial service of a magazine for an income, proposing to write out of office hours. He soon concluded that to win the success he coveted he must furnish something in an original vein. To swim in the great ocean of the commonplace did not please him. The first important story he wrote was a satire on certain fads of the day. He had resolved not to embarrass his employers by offering them any of his work, so he sent his satire to another magazine. It was returned with the indorsement that it was too good for the class of readers of that particular magazine.

Meanwhile as editor he was accepting stories of one Jefferson Spangler. They were not to be considered as within the realms of literature, but they seemed to please people who had little or no literary taste. Spangler was a connection of Bertha Avery's, and she had introduced him to John, asking him to help one of whose literary ability she had a poor opinion, but who was a very "amiable, deserving fellow." John published some of the young man's productions partly to favor Bertha and partly because they helped to widen the circle of the magazine. At least so thought the editor in chief and owner.

While John was experimenting with different novelties to attract the attention of the public to his work he maintained a sort of indefinite understanding with Miss Avery. He would not ask for her till he had met the coveted success. He always had something under way or finished which he hoped would make the expected hit. Bertha encouraged him to push on and he would eventually reap the reward of his perseverance. But, though many of his works were recognized by a few as scintillations of genius, only those of which he himself had an indifferent opinion found their way into print. One or two stories of marked originality were published and attracted some favorable comment, but not enough to fix the attention of the public on the writer.

Meanwhile Jefferson Spangler was plowing in the field of mediocrity. In time he published a novel which met with a moderate success. John Gregory, surprised, read it, or all of it he could force himself to read, and wondered. But what was his chagrin when the owners of the magazine with which he was connected told him that the next issue would contain a likeness and notice of the "new literary light" and that they had decided to "boom" him.

While Gregory had been trying to dash in upon the public by a brilliant stroke, humble Spangler had been slowly crawling up upon it. He possessed a homely faculty of portraying the common events entering into the lives of ordinary people. Having reached a point where capital concluded that it could make his work profitable, he had nothing more to do but wield his pen. Capital did the rest. Within a few years publishers were competing for his next novel and offering him fancy royalties for it.

The next chapter in John Gregory's life was the receipt of a letter from the girl he adored announcing her engagement to Spangler. Since John had never made a formal proposal for her hand, there was no occasion for her entering into any explanation or apology. She did say, however, that she was not to marry her ideal, but people never did that.

John Gregory is getting old and is a bachelor. He is second assistant editor of the magazine that "boomed" his rival, without prospect of ever attaining any greater prosperity. Different opinions are given as to the cause or causes of his not having succeeded, the most common of which is that "he flew too high."

A Spa's Curious Origin.

The discovery of the famous Woodhall spa in Lincolnshire was very curious. Just about a hundred years ago a shaft was sunk in search of coal, but the effort had to be abandoned owing to a rush of water. In time the water found its way into a small brook, and in due course the inhabitants began to speak of the curative powers of the stream. Science investigated the mystery and discovered that the water in the coalless shaft was richly impregnated with various salts and bromine and iodine. Geologists expressed the interesting opinion that ages ago the place was the sandy bed of a shallow lagoon or bay of a tropical sea where seaweeds of giant growth abounded. A mighty convulsion of nature lowered the sea bed, a great river flowed over the place, and in time its debris was formed into a mass of spongy rock or sandstone. Forcing itself through this mass at great pressure some 600 feet below the ground, the water now extracts the constituents of the original seaweed.—London Family Herald.

A Rural Enoch Arden.

"In our little town in a western state," said Brown, "there was a half witted sort of fellow named Bill Wilkes. One day Bill took to the railroad tracks and never reappeared for about six years. In the meantime his wife, Bettie, took in washing and supported the family. One day Bill came back. He went around to the kitchen door, softly opened it, stuck in his head and said, 'Boo, Bettie.' Bettie turned around from her washtub. 'Te, he,' said Bill; 'I scared ye, didn't I, Bettie?' Whenever I see a stage husband return to his family I think of Bill's greeting after six years' absence, 'Boo, Bettie; I scared ye, didn't I?'"—New York Times.

His Kindly Act.

In a Sunday school class recently the teacher sought to impress upon the small boys the virtue of kindly and helpful deeds.

"Now," said she, "let every boy here try to do some kindness during the week and next Sunday report what he did."

Next Sunday arrived, and the teacher proceeded to listen to stories of good deeds done. Finally she reached the smallest boy in the class. His age is nine.

"Well, Willie," she said, "have you done any kindness for any one, anything really helpful, during the week?"

"Yes'm."

"What was it?"

"I let another kid copy me 'rithmetic lesson off me book in school."

ANCIENT BELLS.

They Were Often Quadrangular and Made of Thin Iron Plates.

There are several old bells in Scotland, Ireland and Wales. The oldest are often quadrangular, being made of thin iron plates which have been hammered and riveted together. At the monastery of St Gall in Switzerland the four sided bell of the Irish missionary St Gall, who lived in the seventh century, is still preserved, but more ancient still is the bell of St. Patrick in Belfast, which is ornamented with gold and gems and silver filigree work.

The curfew bell is that about which most has been written and said. It has been thought that it was only used in England, but it was quite common on the continent in the middle ages.

The ringing of bells by rope is still very popular in England, especially in the country, where almost every hamlet, however small, has its church with its peal of bells, which are often remarkably well rung. The first real peal of bells in England was sent by Pope Calixtus III. to King's college, Cambridge, and was for 300 years the largest peal in England. About the beginning of the year 1500 sets of eight bells were hung in a few of the large churches.

In the middle of the seventeenth century a man named White wrote a famous work on bells in which he introduced the system of numbering them 1, 2, 3, 4, etc., on slips of paper in different orders, according to the changes intended to be rung. It is calculated that to ring all the changes upon twenty-four bells at two strokes a second would take 117 billion years.

One of the most famous bells in the world is the first great bell of Moscow, which now stands in the middle of a square in that city and is used as a chapel. This bell was cast in 1733, but was in the earth for over a hundred years, being raised in 1836 by the Emperor Nicholas. It is nearly twenty feet high, has a circumference of sixty feet, is two feet thick and weighs almost 200 tons. The second Moscow bell, which is the largest bell in the world that is actually in use, weighs 128 tons. There are several bells extant which weigh ten tons and over, of which Big Ben, the largest bell in England, weighing between thirteen and fourteen tons, is one. Big Ben is unfortunately cracked.—London Globe.

Ordinance No. 221.

An Ordinance granting Westside Electric Street Railway Company the right to construct an additional street railway siding or track on a portion of Lincoln avenue, Borough of Charleroi.

SECTION I.

Be it ordained and enacted by the Burgess and Town Council of the Borough of Charleroi, Washington county, Pennsylvania, and it is hereby ordained and enacted by authority of the same:

That the right be herein granted to Westside Electric Street Railway company, a Pennsylvania corporation, its lessees, successors and assigns, to enter upon, use and occupy, for the purpose of constructing and maintaining an additional street railway track or siding, a portion of Lincoln Avenue, as now laid out or about to be laid out, not exceeding Three and One half (3 1 2) feet in width and extending from the line of the Borough of North Charleroi in a Southerly direction along the East line of said Lincoln Avenue to a point not exceeding One Hundred (100) feet South of the South line of Thirteenth Street, where it intersects with said Lincoln Avenue.

SECTION II.

In connection with said street railway siding or track, the said company, its lessees, successors and assigns, shall have the right to construct said siding or track with connections at both or either end thereof with the main track or tracks of said Company, its lessees, successors and assigns, and to erect, maintain and use on the street and avenue herein mentioned overhead or other electric system for the supply of motor power and to erect thereon such poles and other supports as are necessary for the support of such system and to complete the electric circuit suitably connecting the rails of the road at their ends or connecting the rails by supplementary ground wires.

SECTION III.

The said company, its lessees, successors and assigns, shall have the right to begin the construction of said railway siding or track at such time as its use shall be deemed necessary or expedient by said company, its lessess, successors and assigns, BUT IT IS HEREIN EXPRESSLY PROVIDED that the use of said portion of said street and avenue herein granted shall continue only so long as the said company, its lessees, successors and ssaigns, shall utilize the property adjoining a part thereof for street railway purposes.

SECTION IV.

The construction, maintenance and operaton of the railway siding or track herein provided for shall be subject to all of the several restrictions, condidtions and privileges set forth in Ordinance No. 157 of said Borough, approved January 18, 1904, granting unto said Company, its lessees, successors and assigns, certain rights and privileges, EXCEPT AS OTHERWISE HEREIN PROVIDED.

ORDAINED AND ENACTED into an ordinance this——day of October, 1909.

Attest:

President of Council.

Secretary.

Examined and approved by me this ——day of October, 1909.

Burgess.

Attest:

Clerk.

Ordinance No. 222.

An Ordinance vacating all that section of the street known as Lincoln avenue, comprising a part of what was formerly the township road and connecting said Lincoln avenue at or near the intersection of the borough of Charleroi and the borough of North Charleroi.

SECTION I.

BE IT ORDAINED AND ENACTED by the Burgess and Town Council of the Borough of Charleroi, Washington County, Pennsylvania, and IT IS HEREBY ORDAINED AND ENACTED by authority of the same:

That upon the passage of this ordinance, all that portion of the street or way situate in said Borough of Charleroi, being a part of what was formerly the Township road connecting Lincoln Avenue and McKean Avenue near the line of the Borough of Charleroi, bounded and described as follows:—BEGINNING at a point on the center line of Lincoln Avenue, as now located, said point being North 33 deg. 59 min. East, Thirty-three and Twelve Hundredths (33.12) feet from an angled point in the center line of said Lincoln Avenue, said angle point being One Hundred Fifteen and Fifteen Hundredths (115.15) feet from the intersection of the center line of Lincoln Avenue and the Northerly line of Thirteenth Street; thence North 3 deg. 10 min. West, Twenty-seven and Thirty-two Hundredths (27.32) feet to the Northerly side of Lincoln avenue; thence along Northerly side of Lincoln Avenue, North 33 deg. 59 min. East, Eighty-one and Twenty-seven Hundredths (81.27) feet to a point; thence South 25 deg. 22 min. East Thirty-eight and Thirty-sixth Hundredths (38.36) feet to the Southerly side of Lincoln Avenue; thence along Southerly side of said Lincoln Avenue, South 33 deg. 59 min. West, One Hundred Four and Thirty-five Hundredths (104.35) feet to a point; thence North 16 deg. 01 min. West, Two and Fifty Hundredths (2.50) feet to a point; thence North 3 deg. 10 min. West, Twenty-four and Fifteen Hundredths (24.15) feet to the place of beginning. BE AND THE SAME HEREBY IS VACATED.

ORDAINED AND ENACTED into an ordinance this——day of October, 1909.

Eczema—A Germ Disease Can Now Be Cured.

The medical profession is all agreed that Eczema is a germ disease, but the thing that has baffled them is to find some remedy that will get to the germs and destroy them.

Zemo, the clean, external treatment, has solved this difficulty by drawing the germs to the surface of the skin and destroying the germ life that causes the diseases. The whole method of treatment and cure by Zemo is explained in an interesting book on the subject issued by the makers of Zemo. It tells how to cure yours if at home of Eczema, Blackheads, Pimples, Dandruff and all diseases of the skin and scalp. Call at Piper Bros. Drug Store for Booklet and learn more about this clean, simple remedy that is now recognized the standard treatment for all diseases of the skin and scalp.

The Way of Authors.

James Whitcomb Riley is evidently no believer in the greatness or enduring quality of modern literature. Some time ago a friend was talking to him about the good times that novelists of today have compared with those of the past.

"You modern writers don't work so hard," he said, "and you are paid twenty times as much as you ought to be."

Mr. Riley gently shook his head. "You labor under a misapprehension, my boy," he replied. "The chief difference between the old authors and those of today is simply this: They died and their works live; our works die and we live—as best we can."—Judge.

The Thieves of Canton.

Canton, China, at present is full of robbers. It is said that in some parts the people are really afraid to go to rest at night, inasmuch as it is certain that thieves will enter and rob the place. Accordingly some one sits up, while others sleep. The following is a queer criticism of China's police by a correspondent: "We have a police force whose work consists mostly in sleeping at post or helping the nearest shopkeeper to chop wood or a neighboring blacksmith to blow his fire."

An Anecdote of Verdi.

The first production of Verdi's opera "Othello" took place at Milan, and all the prominent musical critics of Europe foregathered in the Cathedral City in honor of the occasion. Among them was a Parisian journalist of wide reputation and admitted authority in the musical world. His first care on his arrival in Milan was to seek out Verdi and ask to be allowed to be present at one of the final rehearsals. The composer received him with extreme politeness, but replied that he could not possibly grant his request as he had decided that the rehearsals were to be absolutely private, and he could not make an exception in the favor of any one journalist, however distinguished.

The Paris critic, far from pleased at this answer, protested that in these circumstances his account of the opera might not be all he should like it to be. "You see," he explained to the composer, who affected not quite to understand, "I shall have to telegraph my article the same evening. It will necessarily be hastily written, and the impression in Paris the next day may suffer in consequence."

But Verdi was more than equal to the occasion. "My dear sir," he made answer, "I do not write for 'the next day.'" The critic bowed himself out.

Soup Without a Spoon.

Soup without a spoon seems even harder to negotiate than meat without a fork, and we can sympathize with the complaint recorded in the diary of Felix Platter, a young Swiss, who went to Montpellier in 1552 in order to study medicine. He lodged in the house of his professor, Catelan, one of the greatest doctors of his time, and yet, writes Platter, "we were compelled to eat our stew in the usual French fashion—that is to say, picking the meat out with our fingers and then drinking the broth. In vain we begged our hostess to let us have spoons, but not a single one was to be found in the house, the only implement on the table being a large knife fastened with an iron chain. No one here seems to have ever heard of spoons, which we at home find so useful." Montaigne was astonished when he visited Switzerland in 1580 to find that "at all meals they put on the table as many spoons as there are people present."—Westminster Gazette.

About to Make a Change.

"What is he going to do now?" breathlessly asked the agitated young woman, with her eyes on the daring aeronaut who was clinging to his parachute.

"He is about to sever his connection with the balloon," replied her escort, "to accept a position a little lower down."—Exchange.

Better Healthier Women

are known to exist in this country by thousands because freed from pain and suffering by Lydia E. Pinkham's Vegetable Compound.

Could such a record be made without actual and superior merit? Read what this woman says, and realize that the results secured in her case could not have been made except by a very good medicine.

Lawrence, Kans.—"I was a great sufferer from a weakness, irregular periods, headaches, backaches and other female troubles, which caused a weak and broken-down condition of the system. My side was so sore I could not lie on it. I saw in my daily paper that Lydia E. Pinkham's Vegetable Compound was good for all female troubles and had done so much for other suffering women, so I felt sure it would help me, and it has helped me wonderfully. I got relief from the first bottle. My aches and pains all left me and as I continued taking the Compound I grew stronger. Within three months I was a perfectly well woman, and I want this letter made public to show what benefits women may derive from Lydia E. Pinkham's Vegetable Compound."—Mrs. Julia A. Snow, Route No. 8, Lawrence, Kans.

Science in surgery and electricity has advanced much in the past 30 years, but the treatment of disease by the old fashioned roots and herbs method has never been improved upon. The fact that this leader of them all—**Lydia E. Pinkham's Vegetable Compound**—is to-day the largest seller of any similar medicine in the world, is proof positive of its value and superiority, for with all our enterprise and advertising we could not keep fooling the people for 30 years. Merit and merit alone is what has made Lydia E. Pinkham's Vegetable Compound the standard medicine for treating diseases peculiar to women.

For 30 years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for female ills. No sick woman does justice to herself who will not try this famous medicine. Made exclusively from roots and herbs, and has thousands of cures to its credit.

If the slightest trouble appears which you do not understand, write to Mrs. Pinkham at Lynn, Mass., for her advice—it is free and always helpful.

How often do you eat this food?

A short time ago there appeared in the columns of one of the prominent magazines an article on building brain and muscle by the proper selection of the foods you eat.

A good many people were surprised to find oatmeal placed at the top of the list of foods recommended; but if the article had appeared in an English or Scotch paper every reader would have expected to see first place given to good oatmeal.

As a matter of fact Great Britian and Europe come to us for tremendous quantities of Quaker Oats because it represents to them perfect food, being the richest in flavor and best in cleanliness and purity, of all oatmeals.

Convenience and economy are served by the way it is packed—regular size 10c packages and large size family packages, 25c. 55

A GOOD DINNER

THE HORSE.

He Is So Stupid That He Can Be Taught Any Habit.

There have been on exhibition at various times horses that are apparently prodigies of mathematical insight—that can do anything with numbers that the trainer can do. Yet we absolutely know that no animal can so much as count at all. Furthermore, it is always the horse that performs these marvels, though the horse is the most utterly stupid of all the dumb creatures that man has made his friends.

That is precisely why the horse is always taken to be made into an arithmetician. He is so stupid that he can be taught anything—any habit, that is—and, having no mind to be taken up with his own affairs, can be relied on to do exactly as he is told.

All these arithmetical fakes, whatever their details, are worked in essentially the same way. The horse is taught, by endless repetitions, some mechanical habit. A given signal, and he begins to paw the floor. Another signal, and he stops. Press the proper button, and he takes a sponge and rubs it over a certain spot on a blackboard or picks up a card lying in a certain position. That is all he does. The meaning of the act exists for the spectator only. The pawings count the answer to a problem in addition, the card bears the reply to a question, but the horse does not know it. He merely follows a blind habit, just as he will stop when you say "Whoa," though you interpolate the word into your recitation of the Declaration of Independence.—McClure's Magazine.

Facts Worth Knowing.

There are 2,754 languages.

Envelopes were first used in 1839.

Telescopes were invented in 1500.

The first steel pen was made in 1830.

Watches were first constructed in 1476.

The first iron steamship was built in 1830.

The first lucifer match was made in 1829.

Gold was discovered in California in 1848.

Coaches were first used in England in 1569.

Modern needles first came into use in 1545.

Kerosene was first used for lighting purposes in 1826.—Philadelphia Ledger.

THE DIAMOND CUTTER.

His Skill Has Much to Do With the Brilliancy of the Gem.

When the expert looks at a diamond he can tell you in a moment where it came from and even whether it was cut lately or some years ago. He knows by its color whence it comes, for the color of the Brazilian diamond differs from that of the South African, and even in South Africa different colors are found in different mines.

In the rough the diamond has little brilliancy, for there is a crust that must be cut away before it can properly refract the light, and it is this power of refraction which makes the brilliancy of a diamond and has everything to do with its value in the market. The skill of the diamond cutter has much to do with bringing out this brilliancy. He must do the most he can with the rough stone before him and lose as little as possible of the precious weight in the stone.

Diamonds are found in all kinds of queer shapes, for the carbon may be in any position while being crystallized, and the act of crystallization may affect only parts of that carbon. When the expert cutter has a rough diamond before him he judges almost instantly how it will cut to the greatest advantage. If it inclines to the pear shape he will make a pear shaped diamond of it. If it be square or round the cutting will follow the natural lines as closely as possible, so that the loss may be reduced to a minimum.

To make the stone as brilliant as possible the diamond cutter cuts many facets so as to refract the light from as many points as he can. A full cut brilliant has at least forty-eight facets, and so expert are the cutters that they often cut diamonds so small that it requires a hundred to weigh a carat. Each has forty-eight facets.—Cleveland Plain Dealer.

Recipe For Goodness.

Half of the wickedness of life is owing to misery. Make a man happy and he is good. He revives like a flower refreshed by the dew of heaven; he becomes sanguine, enthusiastic, energetic.—London Graphic.

Loving hearts are like poor folks—they are contented with whatever is given to them.—Swetchine.

Sensitive Tobacco Plants.

In Cuba the best tobacco comes from one strip of land only, the slopes of a certain river, and even there a north wind may ruin the crop. Tobacco is the most sensitive plant we know of. The smallest thing affects its flavor. Plant Virginia tobacco in Germany and the result is a better tobacco, but it is German tobacco, not Virginian. In north Borneo they produce the most delicate and silky leaves that ever were seen, but the tobacco lacks character and taste. Send Havana seeds to the Philippines and you merely produce a second rate Manila.—Cleveland Plain Dealer.

Homemade Names.

"That little girl" remarked the druggist to the doctor, "was just in for 10 cents' worth of tincture of benzine. But I've had it before and gave her benzoin."

"That was easy," answered the doctor. "This morning on a diphtheria case the woman wanted to know if I administered antitoxin with an epidemic syringe."—New York Press.

Just the Opposite.

"When I first met you," cried the woman who had been married for her money, "you occupied a low, menial position, but now, thanks to me, your position"—

"Is a hymeneal one," her husband interrupted.

A Reflection.

"To my annoyance," she said, "I found he had a lock of my hair. How he got it I can't imagine."

The older girl smiled oddly.

"When you were out of the room, perhaps?" she hazarded.—Cincinnati Enquirer.

Literary Analysis.

"Shakespeare's works are marvelous revelations of poetry."

"Poetry!" echoed the Baconian scornfully. "They are merely a collection of ciphers, with some figures of speech thrown in to make them harder."—Washington Star.

His Wise Plan.

"I never have any luck."

"Neither do I," responded the other citizen. "Therefore I keep out of enterprises requiring gobs of luck to be a success."—Louisville Courier-Journal.

THE RUSSIAN MODEL

By EDMOND COMPTON.

(Copyright, 1909, by American Press Association.)

Spencer Fiske at twenty-one, though the possessor of a fortune, did not propose to lead an idle life. He laid out a European trip for himself to last one year, at the end of which time he would return, spend three years in the study of the law, after which he would practice the profession for the rest of the period allotted him on earth. The most practical part of his scheme was to marry at the time he began his work. He believed in marriage as necessary to a complete life and that it should be entered upon with one's judgment well in hand—not dazed by the glamour of the senses.

Six months after forming his plan he found himself one summer morning in St. Petersburg dawdling through a picture gallery, when he came upon a painting the subject of which was a village festival in Russian rural life. The central figure was a girl apparently about fifteen, with beautiful blue eyes, light hair and a delicious smile on two lips nestling between dimples.

Fiske gazed long on the scene, taking it in as a whole and in part, his eyes always returning to the central figure. He went to other rooms, but returned before leaving the gallery to gaze upon the laughing face of innocence. Nor was this all; he returned every day for a week—sometimes twice a day, each time to gaze upon the face that charmed him. One day while thus engaged a man stepped up to him and said in French:

"You seem pleased with my work."

"Your work?"

"Yes; I painted it."

"Where did you find your model for the central figure?"

"In Siberia. I am a traveler as well as painter. I found her in a small village. She is the daughter of a peasant."

A week later Fiske was on a train bound for Siberia. A desire to see the original of the festival scene had taken possession of him, and he saw no reason why it should not be gratified. Reaching the village, he sought the girl and found her in a dooryard spinning. She had grown a year older than when the picture was painted, with a slight budding of her beauty. Fiske knew only a few phrases of Russian, but they sufficed to convey to her the information that he had seen her face on canvas and had come to view the original.

However practical a young man may be, there is one thing about which he is usually stupidly impractical—a young girl's heart. Fiske was insensible to the effect his statement was likely to produce. He was even more stupid than this. He did not know that he had fallen in love with a pretty face. But he found it out all on a sudden, for the girl told him that he had arrived in time to see her married. There was in this wireless message something like the clutching of cold fingers about his heart. With his lips he told her that he was fortunate; with his eyes he told her that he had met with a sudden disappointment. Then she told him that the match had been arranged by her parents.

A few days later he went to view the ceremony. He found the bride in a tent surrounded by her girl friends. On asking where was the groom he was told that he would soon appear, and it was further explained that as soon as the bride saw him she would run away. The groom would follow and must catch her before he could be permitted to marry her. This was the custom in that part of Siberia.

Presently a young man was seen approaching. The girls told the bride that the groom was coming and, leaving the tent, she ran like a fawn to elude him. The man found himself tripped and balked at every turn. Fiske in order to get a better view went up on to a rise in the ground. The girl was giving her intended mate a hard run. The American looked on with a wildly throbbing pulse, and once when the lover was about to grasp the prize his heart stood still. With a quick turn she avoided her pursuer and came running toward the point where Fiske was standing. As she passed him she looked at him. What her eyes said no one except the two knew, but they must have said something of importance, for Fiske gave a quick turn, advanced a few steps, stopped, then suddenly started after the beautiful fugitive.

There was a clamor among the lookers-on, but the American did not hear it. The groom, seeing another chasing his bride, stopped a moment in wonder, then went on as if a fury was spurring him. The girl looked back and, seeing herself doubly pursued, sped on as if on the wings of the wind. One would have thought she sought to elude them both. Fiske, being the fresher of the two, soon gained. Then when the girl saw that he led she lagged and in a few minutes more dropped into his arms.

Thus it was that Spencer Fiske, who had laid out a life plan in which marriage was to be entered upon with circumspection, found himself the possessor of a Russian peasant girl whom he had caught in a race with the man to whom she was betrothed.

The pair were at once surrounded by several hundred people, all talking at once, the father of the girl more furiously than all the rest. The intended groom disappeared. Finally an interpreter was secured, and Fiske proposed that the girl be sent to school for three years at his expense. The proposition was accepted, and at the end of the term he married her at the time he had intended taking a wife on the common sense plan.

Notice to the Public

According to our court's ruling we have discontinued solicitors. All persons wishing beer, will call at the Charleroi Brewery, or send order and money by mail, and the order will be promptly delivered.

A CONTINGENT ASSET.

The Court Didn't Appoint a Receiver to Administer It.

A woman's way of getting around trouble, especially her ability to answer a question without giving any information, is well known, particularly to the members of the bar that have had occasion to cross words with her on the stand. A woman with a well developed sense of humor once foiled the persistent attempt of W. G. Chapin, late editor of the American Lawyer, to elicit information in supplementary proceedings. He tells the story of the failure himself.

"I had been admitted to the bar but a short time and was a fair specimen of the average theory stuffed, practice wanting, law school graduate. How joyously were the commands of the managing clerk obeyed! Here was the looked for opportunity to demonstrate my ability in the noble art of searchingly examining a recalcitrant witness, a woman!

"Of the two, I fancy, however, that it was the lady who was more self possessed when the proceedings opened. She was a dressmaker and had been sued for debt by a dry goods firm. The examination dragged its slow length along, revealing no assets, until finally came the omnium gatherum query asked as a finisher.

"'Have you any property of any kind or nature, real or personal, or any right or interest in property that you have failed to mention?'

"Perhaps it was my tone she disliked. At any rate, her eyes snapped. 'Well, I've got what perhaps you wouldn't call an interest, but it's almost as good. It's an expectation. Must I answer?'

"'If you please.' I was encouraged.

"'Well, you see, it's this way. I've got two sisters, and both of 'em have married finely. Now, neither one of them begins to be as good looking as I am.'

"'Yes.' She had me puzzled.

"'Well, I really don't see why I shouldn't have the same show.'

"It is needless to say that there was no receiver appointed to administer this 'asset.'"—Chicago Record-Herald.

A CONFIDING CONSTABLE.

The Way He Helped the Housemaid Repel the Burglars.

A good story is told at the expense of a constable in rural England, says a writer in the London Telegraph.

Not long ago a young and pretty housemaid arrived at the big house of the neighborhood, and it was observed that our friend's beat often took him in that direction. At first she seemed to resent his advances, but suddenly she changed altogether, and the course of true love appeared to run smooth—for a time.

One night he called rather later than usual. It was dark, and his fair one greeted him somewhat coolly, he thought.

His doubts, however, disappeared when she suddenly declared that she would take him into her confidence. She had overheard the particulars of a plot to break into the house and steal the plate.

"Now, Jim," she said, "here's a chance for promotion. The burglars knew where the plate was kept, so we've shifted it. What I want you to do is to get into the plate cupboard and wait till they come and open the door. Then you'll have 'em."

Jim jumped at the chance and half an hour later was concealed in the cupboard. The burglars came, as expected, and promptly got to work.

The constable chuckled to himself as he heard the muffled whir of a tool on the outside of the cupboard door, and he grasped his staff and waited.

After some minutes' waiting he resolved to take a cautious peep. But the door was fast, securely screwed on the outside by the burglars.

When Jim eventually roused the house and was released from his prison the burglars and plate, together with the pretty housemaid (a confederate), had disappeared. Moreover, the constable's position took a good deal of explaining away.

IT CAME TRUE.

The Large Party and the Calamity That Followed.

"You can't make me believe," Uncle Abner Jarvis was saying, "that there isn't something in fortune telling."

His auditors were grouped round the stove in the corner grocery store. "Ever have any experience with it?" asked one of them.

"That's what I was going to tell you," resumed Uncle Abner. "Once when I was at the county fair I saw a little tent with a sign on the outside of it that said Mme. Somebody-or-other would tell your fortune for 25 cents. I stepped inside just for fun.

"A woman with a thick veil over her face was sitting in a chair on a raised platform. I gave her a quarter, and she looked at my hand. One of the things she told me was that I was going to have a large party at my house in less than a month and that it would be followed by a calamity.

"I laughed at that. Thinks I to myself, 'We hain't had any parties of any kind to our house for two years, and I don't reckon we'll have one quite as soon as that.'

"But it did come true. In about two weeks my wife's Aunt Jane came to visit us, and if you think she ain't a large party you ought to see her. She weighs 287 pounds."

"But how about the calamity?" inquired the man who was sitting on the nail keg after a long pause.

"Well," said Uncle Abner slowly, "she broke down our spare bed the first night she slept in it."—Youth's Companion.

THEY INJURE CHILDREN

Ordinary Cathartics and Pills and Harsh Physic Cause Distressing Complaints

You cannot be over-careful in the selection of medicine for children. Only the very gentlest bowel medicine should ever be given except in emergency cases. Ordinary pills, cathartics and purgatives are apt to do more harm than good They cause griping, nausea and other distressing after-effects that are frequently health destroying and a life lasting annoyance.

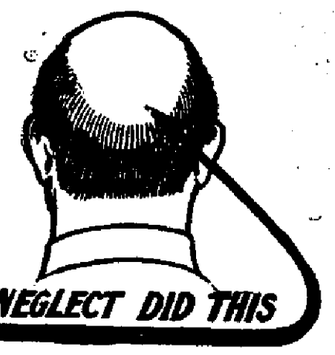
We personally recommend and guarantee Rexall Orderlies as the safest and most dependable remedy for constipation and associate bowel disorders. We have such absolute faith in the virtues of this remedy that we sell it on our guarantee of money back in every instance where it fails to give entire satisfaction and we urge all in need of such medicine to try it at our risk.

Rexall Orderlies contain an entirely new ingredient which is odorless, tasteless and colorless. As an active agent, it embraces the valuable qualities of the best known intestinal regulator tonics.

Rexall Orderlies are eaten like candy. They are particularly prompt and agreeable in action, may be taken at any time, day or night; do not cause diarrhoea, nausea, griping, excessive looseness or other undesirable effects. They have very natural action upon the glands and organs with which they come in contact; act as a positive and regulative tonic upon the relaxed muscular coat of the bowels and its dry mucous lining; remove irritation, overcome weakness, tone and strengthen the nerves and muscles and restore the bowels and associate organs to more vigorous and healthy activity.

Rexall Orderlies completely relieve constipation, except when of a surgical character. They also tend to overcome the necessity of constantly taking laxatives to keep the bowels in normal condition.

There is really no medicine for this purpose so good as Rexall Orderlies, especially for children, aged and delicate persons. They are prepared in tablet form in two sizes of packages: 12 tablets 10 cents, and 36 tablets 25 cents. Remember you can obtain Rexall Remedies in Charleroi only at our store—The Rexall Store. John W. Carroll.



Don't wait till you have a shiny bald head before using **Woodbury's** Hair Tonic, for nothing will make the hair grow when the roots have died. But when life remains **Woodbury's** Hair Tonic invigorates the scalp and brings new life and strength to the hair follicle. It stimulates the growth of the hair and makes it beautiful and abundant.

Woodbury's

THE CHARLEROI MAIL

Entered second class mail at Charleroi, June 15, 1900, according to Act of Congress of March 8 1879

VOL. X. NO. 201. CHARLEROI, WASHINGTON CO., PA., WEDNESDAY, APRIL 13, 1910. One Cent.

COMMITTEES APPOINTED TO CELEBRATE FOURTH

FIREWORKS DISPLAY WILL BE ONE OF THE BIG FEATURES

Aeroplane Exhibition Being Planned for and if Possible Machine of Latest Model Will be Secured for Flights.

COMMITTEES WILL MEET

Charleroi will observe the Glorious Fourth in a manner befitting the standing and dignity of the Magic City. The meeting held in the borough building last night to take action on the proposed Fourth of July celebration was one of the largest and most enthusiastic ever held in this town. Burgess G. W. Risbeck called the meeting to order, and explained that it was by the action taken by the borough council at their last meeting that he had called the people together in order that committees might be appointed for a proposed celebration to be held here July 4. He then appointed J. D. Berryman as chairman and E. W. Hastings secretary.

Captain J. K. Hein, president of council, was called on for remarks, and he stated that council was the prime mover of the proposed celebration, and that the members were ready and willing to help in any way they could to make the day a grand success. T. J. Allen, J. J. Hott and several others gave their opinions as what should be done to make the day one long to be remembered, and committees were appointed with instructions to get busy. There will be another meeting next Tuesday evening at 7:30 in the borough building to hear the reports of all committees, which are as follows:

Finance—R. H. Rush, K. W. Daly, E. W. Hastings, W. R. Gaut, Geo. W. Risbeck.

Printing—J. W. McKean, Edgar R. Abell, C. M. Wertz, Earl Piper.

Entertainment and Sports—J. J. Hott, Fred Clerihue, D. R. Hormell, G. F. Rylands, J. K. Rickey, Geo. W. Might, H. L. Swickey.

Parade—John Majors, Chas. Wallgren, J. K. Hein, W. H. Calvert, Chas. O. Frye, Frank Riva.

Music—Wm. Kirk, R. W. Brown, D. R. Duvall, J. W. Carroll, George Myford.

Decorating—J. E. Masters, F. B. Burwell, John D. Berryman, Louis Beigel, Eugene Fau, C. W. Weltner, Geo. L. West, D. H. Johnston.

Invitation and Reception—Prof. J. G. Pentz, Rev. C. E. Frontz, Theo. J. Allen, J. K. Tener, Rev. G. G. Kerr, J. K. Johnston

Fireworks—Richard A. Roberts, Harry C. Hormell, John M. Fleming, C. M. Malcolm, Louis Collins.

Executive—J. J. Hott, S. C. Todd, G. W. Risbeck.

While no details were arranged at the meeting a proposition to have as the chief feature of attraction an aeroplane ascension met with unanimous approval.

Monessen Hustling.

Through the efforts of the board of trade Monessen has succeeded in inducing the P. and L. E. railroad to add two trains a day to the local service. This is expected to help the out of town trade of the steel town very materially.

CANTATA WILL BE GIVEN TO RAISE MONEY FOR OUTING

To raise funds to defray the expenses of the annual school children's outing and picnic this year a cantata, "The Queen of the May," will be held at School Hall two nights during the early part of May. The cantata will be produced under the direction of Prof. I. T. Daniel, supervisor of music in the Charleroi schools. There will be about 100 children participate, all in costume. The music to the cantata, written by W. Otto Meissner, is pretty and catchy, and the words by Ida B. Helphenstine are suitable. The cantata will last about an hour and a half.

CANTATA TO BE RENDERED

The sacred cantata, "Bethany," libretto by Wm. ApMadoc, music by W. Rhys-Herbert, Mus. Doc., will be sung by the choir of the First Presbyterian church of Charleroi next Sunday evening, under the direction of Prof. I. T. Daniel, commencing promptly at 7:30 o'clock.

As the title of the work would indicate, "Bethany," the simple and sweet home of Lazarus and his sisters, Mary and Martha, wherein Jesus, "The Homeless One," often found rest and comfort, and where some of the wondrous deeds of the Master took place, are the scenes in this work.

The first part of the cantata deals with the visit of the disciples from Jerusalem, who pay tribute to the quiet and renowned village as they approach it; who, when in the presence of the Master, seek His words of truth and wisdom, are received lovingly, are taught the parable of the Good Shepherd, and of the departure of Jesus to the night shades of the hills, where He prays and communes with His Father.

The second part opens with the news brought to Jesus of Lazarus' sickness and death, the sorrow and lamentation at the Bethany home, the coming of Jesus to awake him, the dialogue with Martha concerning the resurrection, the raising of Lazarus, the rejoicing over the miracle, the departure of Jesus again to the hills. His hour drawing nigh, the disciples' forebodings of trouble befalling their Master and their final rejoicing in the hope that the kingdom of love, truth and righteousness would soon be established upon the earth.

The solo parts will be assumed by Mrs. I. T. Daniel, soprano; Miss Helen Woodhall, contralto; Morris J Stephens, the noted voice teacher of Pittsburg, tenor, and Prof. I. T. Daniel, bass and director. Mrs. W. C. Fishburn will preside at the piano, with Miss Leila Orange at the organ.

Wants Old Chair.

Congressman John K. Tener, past exalted ruler of the B. P. O. E., is deeply interested in securing for the National Museum of the Grand Lodge of Elks, a chair now owned by George B. Lloyd, of Indian Head, near Washington. The chair is composed of the horns, hoofs and hide of an elk and was once owned by Abraham Lincoln. It was in fact used as a part of the furnishings of the White House during Lincoln's Presidency.

TAKING TESTIMONY TODAY IN ECLIPSE MINE MATTER

Special Danger Said to be Envolved in Gas which Has Been Found to Exist at Frequent Intervals in Mine.

The commission appointed by the court (Richard Maze, R. N. Pollock and Joseph Gallagher) to examine the Eclipse mine, south of Elco, of the Monongahela River Consolidated Coal and Coke company and report the conditions as they are or have been, together with the facts in the case, to the court within 30 days are at the Wilbur hotel taking testimony in the case from the officers of the mine, the mine inspectors and miners, who convened with the Coal company, in trying to prevent the use of safety lamps on pillar work of the above named mine.

The history of the case is as follows: The inspector of the district, F. W. Cunningham, inspected the mine in November, 1909, and recommended the use of safety lamps on pillar work, and the superintendent wrote to the inspector and said that he would order the lamps and put them in the mine on this class of work. On the second inspection of the mine in March, 1910, the inspector found that the lamps had not been introduced in the pillar work and he again notified the superintendent, Wm. Munford, to adopt their use on this kind of work which he refuses to do.

The inspector communicated with the Chief of the Department of Mines in Harrisburg, who appointed inspectors Alexander McCanch of Monongahela, J. F. Bell of Dravosburg, C. P. McGregor of Braddock, Arthur Neale of Crafton and John I. Pratt of Pittsburg to examine the mine and proceed according to the mine laws. They examined the mine and considered that, to work pillar work with open light there was immediate danger from the overlying strata subsiding, or other cause that may bring in a sudden inflow of gas that may cause an explosion. The superintendent was then notified to remove such danger by excluding open lights on pillar work which they negleted to do. The inspectors appealed to the court for an injunction restraining the operation of the mine until the said danger was removed.

The mine is now closed down and by the order of the court it will remain closed until the question involved between the inspectors and the coal company is settled. The coal company told the court that they could not get the miners to use the safety lamps. The law regulates questions of this character. The commission has up to this time spent two days in the mine and it will take about two days yet before they finish their examination.

After all is said it is a matter of law. The mine records show that gas has been found at frequent intervals and it cannot be said that it will not be so again on pillar work, and this kind of work involves a special danger that the mine law contemplates when it says in Article 5, Section 5, in part of "Pillar workings and other working places in any mine where a sudden inflow of said explosive gas is likely to be encountered, by reason of the subsidence of the overlying strata or from other causes, shall be worked exclusively with locked lamps." The miners contend that there is only 20 to 25 feet of cover on the mine and there is no danger from gas. This is the case of the outcrop line which the mine has not yet reached with pillar work where the mine croses a ravine there is little cover. In this part of the mine there is no pillar work.

CENSUS MAN BEGINS WORK NEXT FRIDAY

The census begins April 15 and must be completed in thirty days.

The enumerators will wear a badge inscribed "United States Census, 1910."

The law requires every adult person to furnish the prescribed information, but also provides that it shall be treated confidentially, so that no injury can come to any person from answering the questions.

The Census Bureau, prior to April 15, will distribute to every farm owner and tenant in this State a blank or schedule containing the Census questions relative to farm operations and equipment. This should be filled up, if possible not later than the morning of April 15, but if anyone has been unable to fill it up by that time, he should do it as soon afterwards as he can.

People who do not speak English or who do not understand the schedule completely should get help from others, if possible, in filling it up.

The President has issued a proclamation, calling on all citizens to cooperate with the Census and assuring them that it has nothing to do with taxation, army or jury service, compulsory school attendance, regulation of immigration, or enforcement of any law, and that no one can be injured by answering the inquiries.

It is of the utmost importance that the farm census of this State be complete and correct.

Therefore every farm owner and tenant should promptly, fully and accurately fill up the "Advance Farm Schedule" and carefully preserve it for the enumerator when he calls.

Miss Bradley of Pittsburg, who has been here the past few days visiting friend, returned to her home today.

THREE ARE HURT IN A COLLISION

When a Fairhaven car northbound and a Charleroi car southbound came together in a head-on collision between Elwyn and Cooley, near Castle Shannon, last night at 8 o'clock three men were injured and the cars were somewhat mashed.

THE INJURED.

Motorman Glen Anderson of the Fairhaven car, right leg bruised and sprained.

Conductor Arthur Hayes of the same car, nose broken and hurt about the head.

Track Foreman John Fisher of Finleyville, who was riding on platform of Fairhaven car, right leg bruised.

The cars were running at a fair rate of speed when the collision occurred. The Fairhaven car, being the lighter, was pretty badly wrecked as far as the cab was concerned, the cab of the larger Charleroi car being less seriously damaged. There were no passengers on the Fairhaven car and everyone on the Charleroi car escaped injury.

Removing Plumbing Shop.

J. M. Fleming is moving his plumbing shop and store today from his old location in the Masonic building, where he has been for several years, to his own building, 427 Fallowfield avenue, in the store room formerly occupied by McDermott's Creamery Products company. Mr. Fleming will have more commodious quarters, and expect to be able to better serve his increasing trade. He has several important plumbing contracts at the present time.

J. M. Fleming is removing his plumbing shop and store to his own building, 426 Fallowfield avenue.

201t1

REMONSTRANCE TO ACTION OF TRUSTEES FILED BY MEMBERS

Through their attorney, D. M. McCloskey, Esq., a number of the members of St. James A. M. E. church of Charleroi have filed a remonstrance to the incorporation of the church, as proposed by the trustees, through their attorney, W. N. Butler. The application for a charter has been filed and the remonstrance was just entered yesterday. It is claimed that the action to apply for incorporation was taken with undue authority and without church action.

Mrs L Collins is spending the day in Pittsburg.

RESULTS ANNOUNCED

A joint conference between the coal operators and miners of Pittsburg District No. 5 United Mine Workers met in Pittsburg this morning, where the miners' district conference is in session with a view of reaching some agreement on a wage scale. At yesterday's session of the convention a committee was appointed to act with the officers as a scale committee. The miners entertain strong hopes that a settlement will be reached.

The result of the official vote for district officers was announced yesterday; Francis Feehan, re-elected president by a good majority over. S. A. Whetzel; Van Bittner, vice president; Timothy Donovan, secretary and treaurer; George Dagger, international board member; William Dinnin, auditor and William Hargest, William Brewer and Michael Marracini tellers. The board members from the various districts were chosen as follows: Thomas Sheehan, first; Otto Slater, second; S. A. Laverik, third, George Bolton, fourth; Michael Halapy, fifth, and William McKay, sixth.

The scale committee to meet the operators today is composed of S. A. Whetzel, T. P. Hanaway, James Miller, Hugh McLaughlin, Robert Garrity. The district officers also will take part in the conference.

WERE QUIETLY MARRIED IN PITTSBURG MONDAY

After having been quietly married in Pittsburg on Monday by Rev. Clayton A. Smucks, of the Smithfield Methodist Episcopal church, Jacob Sampson and bride, who was Miss Mary Emily Wilson, arrived in Charleroi last night, the bride's home. The couple will spend a few weeks here after which they will likely go to Youngstown, Ohio, to reside. The ceremony was performed at the parsonage at 5 o'clock, Monday, and the couple have been in Pittsburg ever since. The bride is the daughter of Mr. and Mrs. B. E. Wilson of Fallowfield avenue, and has a large acquaintanceship in Charleroi. The groom is a traveling salesman, and comes of a good family.

John McIlvaine went to Frankfort, Kentucky, today where he will play ball the coming season.

QUIT CLAIM DEED MUST BE SECURED OF COOPER HEIRS

Charleroi Land Co. Could Take the Necessary Steps to Free Property Owners From Troublesome Burdon

ANXIETY IS MANIFESTED

Since the attorneys for the Government discovered a flaw in the title of the properties to be taken over for the site of the Federal building on Fallowfield avenue and Seventh street, and their subsequent action to clear the same, more or less anxiety has been manifested by property holders in the borough whose holdings are similarly entailed. So far as known no other individual action has been taken to clear the tites of this defect, although there has been some talk of a joint movement on the part of as many property owners as could be interested for that purpose.

This lien was entered in 1839 against the property when it was owned by the late Valentine Cooper. Athough the property has changed hands several times since, the lien was never satisfied. When the property was purchased by the Charleroi Land company, all subsequent research of title apparently did not go back of this company's title, and it was taken for granted that the abstract was clear. It remained for the Government attorneys to discover differently. Now, before a clear title can be given in any transfer of the affected property, individual action will have to be taken to clear up the title.

The other day a Charleroi citizen in conversation with a prominent corporation attorney mentioned the circumstance, and the attorney stated that it was an easy proceeding to remove the lien. All that is necessary, he stated, is for the Charleroi Land company, by whom the lots were originally sold, to get a quit claim deed from the Cooper heirs which will satisfy the lien and clear up the titles of all the individual holdings. If this is the case it is thought that the Charleroi Land company will take this step to satisfy the old lien and make good all the titles they have given since their organization. It is probable that some sort of a movement will be instituted soon to clear up the whole property so that individual action will not become necessary, as this would entail a hardship on many of the small house-holders in the borough.

Social Well Attended.

A large crowd was in attendance at the social of the Lady Maccabees at the home of Mrs. Katharine Gray of McKean avenue last evening. Guests were present from Monongahela, Donora, Monessen and Belle Vernon, as well as from town, and music, games and an appetizing lunch were the features of entertainment. At a late hour all departed, after a delightful evening The next social will be at the home of Mrs. M. J. McGee of Fallowfield avenue, to which all are invited.

G. T. Barger left this morning for New Bethelehem, Clarion county, for a few days visit with his parents.

J. K. Tener, Pres. S. A. Walton, Vice Pres. R. H. Rush, Cashier.

April 12 in American History.

1771—Henry Clay, statesman, called the "great pacificator," born, died 1852.

1861—The first shot at Sumter; beginning of the civil war

1902—Rev T. De Witt Talmage, noted Presbyterian divine, died, born 1832.

ASTRONOMICAL EVENTS.

(From noon today to noon tomorrow.) Sun sets 6:32, rises 5 20, moon sets 10:22 p. m., Halley's comet moving at a speed of more than 100,000 miles an hour.

Eagle Will Scream.

The large and enthusiastic outpouring of citizens at the preliminary meeting at the borough building last night to take steps for a public observance of the Fourth of July here, insures the success of the project. It is now safe to assume that the Eagle will scream in a manner never before known in the upper Monongahela valley, and that Charleroi will again win laurels as a promoter of public undertakings. All the rest now is a matter of detail.

One of the proposed features of attraction, which marks the originality and progressiveness of Charleroi citizens, is the proposition to secure an aeroplane. This will be the first exhibition of the kind ever shown in the valley, and is one of the wonders of the age. Other attractions will be in proportion and it will be well for the outside public to keep an eye on Charleroi from this time until the dawn of the Glorious Fourth. The Eagle will certainly scream here that day.

Real Issues.

In view of the nomination of the Assemlymen and State Senators at the June primary, it will be wisdom on the part of the people to turn over in their minds some of the real State issues involved. Ordinarily political campaigns for Legislators hinge on political factional control. This time there is no special occasion for that, as no factional discord to speak of exists in the State. The finances are in excellent condition, the Commonwealth is virtually out of debt, and Governor Stuart's administration had been honest, clean and economical, and has the approval of friends and political foes alike.

[illegible] that should be considered before the various candidates begin to canvass for the support of voters, is more appropriations for improved roads; a uniform system for sewage disposal, and State aid in constructing and maintaining the same, under certain conditions; more aid in promoting and maintaining the juvenile courts; a uniform system of weghts and measures and State inspectors to enforce the same; increased aid in treating and stamping out tuberculosis, and many other matters that have a direct bearing upon the comfort and well being of the people in general.

If the people would pay attention to some of these issues instead of emotional appeals that have a personal bearing, better conditions would result. The issue that affects every man, woman and child every day in the year is the one that should command the support of the voters. That is the legislation that is needed now, and the people should see that those who aspire to the office of Assemblyman or Senator have the ability and dispositon to work along these lines.

A Matter of Enforcement.

[illegible] the Independent Brewing company of Pittsburg has decided to withdraw all the applications for county license of breweries under its control in that county, and make application for State license only. This will give them the privilege to sell only to licensed retail dealers, and will take away from them the privilege to sell directly to consumers in the county.

Presumably this action is based on the recent decisions of the various county courts—Washington in particular—in interpretating the license laws of the State in regard to the privileges of breweries and their agents in selling to consumers. The extension of this branch into every part of the county where breweries were located through agents had reached such proportions that the jurisdiction of the license court was virtually set aside. Gross excesses followed, and the people in general blamed the statutes for this evil. Investigation, however, proved that it was not the law that was to blame. It was the lack of enforcement that was responsible for the evils of indiscriminate peddling and selling of beer and other liquors.

Judge McIlvaine's interpretation of the law governing the sale of beer within a county by brewery agents has put the proper meaning and intent before the public This action has been followed by other county courts, and the indications are that this construction will be applied in every county throughout the State. By this it is seen that the license law does not grant brewery agents leave to become free lances in every community in the traffic of their product, and that the evils that have resulted from the indiscriminate sale is contrary to law. It exists only where the people tolerate it, but when the law is enforced the regulation is sufficient to protect unlicensed communities.

ELECTRIC SPARKS

To follow a crowd occasionally means to take part in a lynching bee.

The United States may have a population of 90,000,000. However, after waiting the past nine years to find out, we surely should not kick because we have to wait a few months more to learn the exact figures.

It's a hard question to decide which to believe when two reputable men make exactly the opposite statements.

When Pinchot and Roosevelt met there was an exchange of compliments. The people would like to know what followed that.

Nobody said our gas bills were inflated. What we said was that the gas company shouldn't charge us so much for the wind we use.

One of the compensations of being a milkman is that one may be able to see the comet.

Mrs. A—"Mrs. C. has three new hats." Mrs. B—"What does she want so many for? She never goes to church."

A woman went to buy a hat the other day, but when she got to the store she found that before she could think of getting a seasonable piece of headgear, she would have to buy about $15.00 worth of hair. Not having that much money she decided not to invest.

A very unfortunate girl lives in Atchison. She can't brag of her ancestors, for they lives in Atchison and Atchison people know how worthless they were. She can't boast of her kin, for they live in Atchison, and she can't brag of her future, because she is engaged to a cheap little man who has no future.—Atchison Globe.

Hi diddle diddle,
The cat played the fiddle,
The cow jumped over the moon;
And now you know why
That beef is so high,
So let's hope she'll come down
pretty soon.

One of the pleasures of having relatives poorer than yourself is that you can boast to them of new clothes and social pleasures, when you have any.

Members of council do not seem to admire the prospect of going over the tax exoneration list any more than we thought they would.

When it comes to managing about 160 players, about the total number who have been signed by teams in the church league, there is bound to be more friction than was caused by the upheaval in Congress.

MAKING A TUNNEL.

The Way Railroad Engineers Bore Through a Mountain.

Sometimes the construction engineer brings his new line face to face with a mountain too steep to be easily mounted, and then he prepares to pierce it. Tunnels are not pleasant to ride through. They are, moreover, fearfully expensive to construct, and they necessitate a double inspection. But—and the "but" in this case is a very large one—they reduce grades and distances in wholesale fashion, and so in a mountainous country the engineer must be prepared to drive tunnels and the folk who come after him to operate them The tunnel job is apt to be a separate part of the work. It calls for its own expert talent.

If the tunnel is more than a half or three-quarters of a mile long it will probably be dug from a shaft or shafts as well as from its portals. In this way the work will not only be greatly hastened, but the shafts will continue in use after it is completed as vents for the discharge of engine smoke and gases from the tube

The ordinary course of such work is by the use of cutting shields proceeding simultaneously from the portals and from the footings of the shafts. These shields are to be likened to steel rings of a circumference only slightly greater than that of the finished tunnel Men working on different levels of this shield with pick and with drill and dynamite constantly clear a path for it, whereupon it is pressed forward Tracks follow the cutting shield, and more locomotives, steam or electric, are used in removing the material The use of electricity keeps the tunnel quite clear of gases and makes the safest light for the workers.

In rare cases the rock through which the tunnel is bored is strong enough to support itself But in most cases the engineers prefer to line the bore, with brick, as a rule, and this lining is set in place right in the path of the cutting shield. After long weeks and perhaps months of work the time comes when the different bores meet and the tunnel is a single underground tube from portal to portal

It Gets the Criminals.

According to the Chinese method of criminal prosecution, a man is responsible for the crime he may have committed personally, but if he chooses to escape justice by running away from the place where the deed was committed then the remaining members of his immediate family are held and punished in lieu of the real culprit. This may seem a strange way of attracting the real criminal back to the scene of his crime, but it appeals to the religious side of the man's superstitious nature. According to their religion, the man who forsakes his parents when in peril will find his soul sailing around through hades without chart or compass for all eternity In view of this, compliance with the law is very prompt, for John Chinaman does not care to take the desperate chance.

What the Jury Found.

Some years ago the body of a well dressed man was found in a field on the outskirts of an English town. There were no marks of violence, and it was doubtful whether death had occurred from natural causes or if the individual had committed suicide In due course the body was identified and a gentleman who had been acquainted with the deceased was called upon to give evidence at the inquest Among other things, he stated that he had always considered him to be a man of marked idiosyncrasies, and his brain was continually excited by his irresistible fondness for chimeras of various kinds The jury was evidently satisfied with his statement and immediately brought in a verdict that "death was caused by idiosyncrasies forming on the brain in consequence of excessive indulgence in chimeras," adding a rider that "it should be a warning to people to refrain from that and other intoxicating beverages."

THE "BREAK" IN THE GAME.

Baseball Almost as Much Psychological as Athletic.

Nearly every baseball game is won and lost on one play—a play that comes at the psychological instant Among the players who do not study psychology the crucial moment is known as "the break," a phenomenon which no one has analyzed and which the players themselves do not understand. Twenty men on the bench are watching closely and intently every move of the pitcher, every swing of his arm. The tide of battle rises, ebbs and then suddenly at the start of some inning something happens. What it is no one outside the psychic sphere of influence ever will understand but the silent, tight lipped, watchful, alert fellows on the bench see something or feel something, and the mysterious break" has come

"One ball!" The players on the bench suddenly stiffen and prepare for action

"Two balls!" Two players jump for bats and begin swinging them the coachers, who have yelled only because it was their duty, suddenly begin raging screaming and praying the ump and the manager, who has appeared half asleep, makes a trumpet of his hands and [illegible] ing loud orders and wild taunts

The spectators do not understand anything has happened Other batters have had two balls called many times and it looks the same to the spectator who is beyond the mysterious "break sphere In two more moments the players' bench is a madhouse with players men shouting, screaming or crying, moving "Three balls" and a madman rushes out to the "deck" "Four balls!" and the spectators join the players in the demonstration The madness is spreading Crack—a base hit, a bunt, a wild throw, another base hit screams shouts impreca tions, a roar of frantic applause a home run! The manager reaches for his glove spits into it and says quietly "Then runs—we've got em The "break" is over, and the players' bench is again the quietest part of the grounds The surge of enthusiasm, confidence and noise subsides and the game is won

Baseball is almost as much psychological as athletic Why one team can beat a stronger one regularly and lose to a weaker with the same regularity why one batter can hit one pitcher and is helpless before another who one pitcher is effective against a strong team and at the mercy of another that cannot bat half as hard are psychological problems—American Magazine.

A MISER'S END.

Meanness of M. Vandille and the Way He Hastened His Death.

M. Vandille was chief magistrate at Boulogne and by miserly habits left a fortune of $4,000,000. His usual diet was bread and milk. The bread cost very little, and after eating his loaf at home his habit was to become his own public milk inspector, whom as chief magistrate he had the right to appoint And so as he decided, to protect the inhabitants from being imposed upon by an inferior quality of milk he took his walk immediately after eating his loaf and demanded to taste the milk of every salesman he passed, thus saving himself from purchasing any Misers are generally strong men—they have to be so in order to live a life of privation—but eventually Vandille like other misers, was seized with illness, and the surgeons had to be called in In those days they bled their patients The surgeon asked Vandille half a livre for the operation, but the millionaire ordered him at once out of his sight and sent for the apothecary The apothecary refused to cut the price down, so Vandille sent for a poor barber, who undertook to open a vein for three sous a time.

"Aye, but," said this worthy economist, "how often, friend, will it be necessary to bleed me?"

"Three times"

"And what quantity of blood do you intend to take each time?"

"Eight ounces"

"Well, but why can't you take the whole twenty-four ounces at once? You want to make a job of me, you scoundrel! Here, sir, there are your three sous Take the twenty-four ounces immediately" The barber was generous to obey. M. Vandille lost the twenty-four ounces of blood and died in a few days, leaving all his vast treasures to the king whom he made his sole heir —Strand Magazine

The Oldest Bridge in Paris.

The Pont Notre Dame is the oldest bridge in Paris It was first built in 1413 in the reign of Charles VI., but it was carried away together with the houses which lined it, by ice floes when the frost broke in 1499. A new bridge was begun at once under the direction of Jean Joconde of Verona and was ready for traffic in 1507. On that bridge stood the famous picture shop of Gersaint, which had a sign board specially painted for it by Watteau —Westminster Gazette

Jolting Him.

Bashful Youth—Miss Bella, does—does your mother object to my coming here so much? Fair Charmer—Oh, I think not! I heard her telling papa the other evening that you merely came to pass away the time; you didn't mean anything serious.—London Tit-Bits.

The Division.

"What!" exclaimed Mrs. Flatleigh. "You don't mean to tell me you pay a girl $10 a week for cooking?"

"Oh, no!" replied Mrs. Urbanville. "We only pay her $2 a week for cooking. The other $8 is for staying."—Chicago News.

GET away from the idea

That buying clothes of unknown make is a good policy—

Be as good to yourself as you are to your stomach—

You wouldn't eat things you knew were not good for you, would you—then why would you buy clothes of unknown quality—

IT'S YOUR KIDNEYS

Don't Mistake the Cause of Your Troubles. A Charleroi Citizen Shows You How to Cure Them

Many people never suspect their kidneys. If suffering from a lame, weak or aching back they think that it is only a muscular weakness; when urinary trouble sets in they think it will soon correct itself. And so it is with all the other symptoms of kidney disorders. That is just where the danger lies. You must cure these troubles or they may lead to diabetes or Bright's disease. The best remedy to use is Doan's Kidney Pills. It cures all ills which are caused by weak or diseased kidneys. Charleroi people testify to permanent cures.

Mrs. W. L. Evans, 104 Lookout avenue, Charleroi, Pa., says: "Several years ago a member of my family complained of a dull pain in the small of the back and difficulty with the kidney secretions. Doan's Kidney Pills were used and proved so beneficial that when the person referred to recently began to suffer from kidney trouble again, Doan's Kidney Pills were immediately procured at Piper Bros.' Drug Store. They proved to be a specific for disorders of the kidneys. I highly recommend this excellent preparation to other kidney sufferers."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

Free Concert.

The Charleroi Italian Band will give a free concert on Saturday evening at 6 o'clock in front of Charleroi House. Music of a very high order will be rendered and you will miss a big treat by not hearing it. All come out. P. Lucate, Leader. 199t3p

A meeting of the stockholders of the Charleroi Oil company, which was recently chartered and is operating in Ohio, was held at the Charleroi Savings and Trust company yesterday afternoon. Several out-of-town stockholders were present.

The Style Standard

The Emerson Shoe
HONEST ALL THROUGH

IN the 2-eyelet model for Spring and Summer is the standard Shoe Fashion. We call your particular attention to the close-fitting uppers, which hug the instep and sides of the foot, giving that neat appearance which always marks the careful dressed man. An exclusive method of cutting the upper leather makes this perfect Oxford fit sure. But we can show you better by a personal demonstration. May we prove the fit, style and comfortable wearing qualities of an Emerson to you?

IS GENIUS DEVISABLE?

By HARRIET COWLEY.

[Copyright, 1909, by American Press Association.]

Whoever is born with superior mental powers must pay a penalty. Such persons are not satisfied to work in a common field. They struggle for a higher one to which admittance is denied them until their fitness for it is recognized. And how many a "mute inglorious Milton" has lived and died without any such recognition while his untalented brother has won a high position! The same is often true of one who loves madly. The very intensity of his person robs him of his coolness. He frets and fumes while a rival unmoved by sentiment lays siege to the maiden and wins her by regular approaches.

When John Gregory went to college he expected to lead his fellow students as he had led his schoolmates and afterward to lead the world as he had led his university associates. The only other being he loved except himself was Bertha Avery, and he loved her far better than himself. It was Bertha who was accountable for her lover's self admiration. She recognized his superior endowments and called his attention to them. Therefore he believing that through them he would win and hold her love, came to set great store by them.

John was graduated at the head of his class. Not only this, but he was the college literary light of his time, editor of the university magazine and winner of all the prizes given for essays. Indeed, so marked was his success as a college scribbler that he determined to enter the field of literature. He was never quite sure that Bertha loved him—indeed, she had never told him that she did—and he did not expect to make the conquest of her heart till he could lay a laurel wreath at her feet.

John entered his chosen field encouraged by all. There was no doubt that he had very superior literary faculties. He entered the editorial service of a magazine for an income, proposing to write out of office hours. He soon concluded that to win the success he coveted he must furnish something in an original vein. To swim in the great ocean of the commonplace did not please him. The first important story he wrote was a satire on certain fads of the day. He had resolved not to embarrass his employers by offering them any of his work, so he sent his satire to another magazine. It was returned with the indorsement that it was too good for the class of readers of that particular magazine.

Meanwhile as editor he was accepting stories of one Jefferson Spangler. They were not to be considered as within the realms of literature, but they seemed to please people who had little or no literary taste. Spangler was a connection of Bertha Avery's, and she had introduced him to John, asking him to help one of whose literary ability she had a poor opinion, but who was a very "amiable, deserving fellow." John published some of the young man's productions partly to favor Bertha and partly because they helped to widen the circle of the magazine. At least so thought the editor in chief and owner.

While John was experimenting with different novelties to attract the attention of the public to his work he maintained a sort of indefinite understanding with Miss Avery. He would not ask for her till he had met the coveted success. He always had something under way or finished which he hoped would make the expected hit. Bertha encouraged him to push on and he would eventually reap the reward of his perseverance. But, though many of his works were recognized by a few as scintillations of genius, only those of which he himself had an indifferent opinion found their way into print. One or two stories of marked originality were published and attracted some favorable comment, but not enough to fix the attention of the public on the writer.

Meanwhile Jefferson Spangler was plowing in the field of mediocrity. In time he published a novel which met with a moderate success. John Gregory, surprised, read it, or all of it he could force himself to read, and wondered. But what was his chagrin when the owners of the magazine with which he was connected told him that the next issue would contain a likeness and notice of the "new literary light" and that they had decided to "boom" him.

While Gregory had been trying to dash in upon the public by a brilliant stroke, humble Spangler had been slowly crawling up upon it. He possessed a homely faculty of portraying the common events entering into the lives of ordinary people. Having reached a point where capital concluded that it could make his work profitable, he had nothing more to do but wield his pen. Capital did the rest. Within a few years publishers were competing for his next novel and offering him fancy royalties for it.

The next chapter in John Gregory's life was the receipt of a letter from the girl he adored announcing her engagement to Spangler. Since John had never made a formal proposal for her hand, there was no occasion for her entering into any explanation or apology. She did say, however, that she was not to marry her ideal, but people never did that.

John Gregory is getting old and is a bachelor. He is second assistant editor of the magazine that "boomed" his rival, without prospect of ever attaining any greater prosperity. Different opinions are given as to the cause or causes of his not having succeeded, the most common of which is that "he flew too high."

A Spa's Curious Origin.

The discovery of the famous Woodhall spa in Lincolnshire was very curious. Just about a hundred years ago a shaft was sunk in search of coal, but the effort had to be abandoned owing to a rush of water. In time the water found its way into a small brook, and in due course the inhabitants began to speak of the curative powers of the stream. Science investigated the mystery and discovered that the water in the coalless shaft was richly impregnated with various salts and bromine and iodine. Geologists expressed the interesting opinion that ages ago the place was the sandy bed of a shallow lagoon or bay of a tropical sea where seaweeds of giant growth abounded. A mighty convulsion of nature lowered the sea bed, a great river flowed over the place, and in time its debris was formed into a mass of spongy rock or sandstone. Forcing itself through this mass at great pressure some 600 feet below the ground, the water now extracts the constituents of the original seaweed.—London Family Herald.

A Rural Enoch Arden.

"In our little town in a western state," said Brown, "there was a half witted sort of fellow named Bill Wilkes. One day Bill took to the railroad tracks and never reappeared for about six years. In the meantime his wife, Bettie, took in washing and supported the family. One day Bill came back. He went around to the kitchen door, softly opened it, stuck in his head and said, 'Boo, Bettie.' Bettie turned around from her washtub. 'Te, he,' said Bill; 'I scared ye, didn't I, Bettie?' Whenever I see a stage husband return to his family I think of Bill's greeting after six years' absence, 'Boo, Bettie: I scared ye, didn't I?'"—New York Times.

His Kindly Act.

In a Sunday school class recently the teacher sought to impress upon the small boys the virtue of kindly and helpful deeds.

"Now," said she, "let every boy here try to do some kindness during the week and next Sunday report what he did."

Next Sunday arrived, and the teacher proceeded to listen to stories of good deeds done. Finally she reached the smallest boy in the class. His age is nine.

"Well, Willie," she said, "have you done any kindness for any one, anything really helpful, during the week?"

"Yes'm."

"What was it?"

"I let another kid copy me 'rithmetic lesson off me book in school."

ANCIENT BELLS.

They Were Often Quadrangular and Made of Thin Iron Plates.

There are several old bells in Scotland, Ireland and Wales. The oldest are often quadrangular, being made of thin iron plates which have been hammered and riveted together. At the *monastery of St. Gall in Switzerland* the four sided bell of the Irish missionary St. Gall, who lived in the seventh century, is still preserved, but more ancient still is the bell of St. Patrick in Belfast, which is ornamented with gold and gems and silver filigree work.

The curfew bell is that about which most has been written and said. It has been thought that it was only used in England, but it was quite common on the continent in the middle ages.

The ringing of bells by rope is still very popular in England, especially in the country, where almost every hamlet, however small, has its church with its peal of bells, which are often remarkably well rung. The first real peal of bells in England was sent by Pope Calixtus III. to King's college, Cambridge, and was for 300 years the largest peal in England. About the beginning of the year 1500 sets of eight bells were hung in a few of the large churches.

In the middle of the seventeenth century a man named White wrote a famous work on bells in which he introduced the system of numbering them 1, 2, 3, 4, etc., on slips of paper in different orders, according to the changes intended to be rung. It is calculated that to ring all the changes upon twenty-four bells at two strokes a second would take 117 billion years.

One of the most famous bells in the world is the first great bell of Moscow, which now stands in the middle of a square in that city and is used as a chapel. This bell was cast in 1733, but was in the earth for over a hundred years, being raised in 1836 by the Emperor Nicholas. It is nearly twenty feet high, has a circumference of sixty feet, is two feet thick and weighs almost 200 tons. The second Moscow bell, which is the largest bell in the world that is actually in use, weighs 128 tons. There are several bells extant which weigh ten tons and over, of which Big Ben, the largest bell in England, weighing between thirteen and fourteen tons, is one. Big Ben is unfortunately cracked.—London Globe.

Ordinance No. 221.

An Ordinance granting Westside Electric Street Railway Company the right to construct an additional street railway siding or track on a portion of Lincoln avenue, Borough of Charleroi.

SECTION I.

Be it ordained and enacted by the Burgess and Town Council of the Borough of Charleroi, Washington county, Pennsylvania, and it is hereby ordained and enacted by authority of the same:

That the right be herein granted to Westside Electric Street Railway company, a Pennsylvania corporation, its lessees, successors and assigns, to enter upon, use and occupy, for the purpose of constructing and maintaining an additional street railway track or siding, a portion of Lincoln Avenue, as now laid out or about to be laid out, not exceeding Three and One half (3 1 2) feet in width and extending from the line of the Borough of North Charleroi in a Southerly direction along the East line of said Lincoln Avenue to a point not exceeding One Hundred (100) feet South of the South line of Thirteenth Street, where it intersects with said Lincoln Avenue.

In connection with said street railway siding or track, the said company, its lessees, successors and assigns, shall have the right to construct said siding or track with connections at both or either end thereof with the main track or tracks of said Company, its lessees, successors and assigns, and to erect, maintain and use on the street and avenue herein mentioned overhead or other electric system for the supply of motor power and to erect thereon such poles and other supports as are necessary for the support of such system and to complete the electric circuit suitably connecting the rails of the road at their ends or connecting the rails by supplementary ground wires.

SECTION III.

The said company, its lessees, successors and assigns, shall have the right to begin the construction of said railway siding or track at such time as its use shall be deemed necessary or expedient by said company, its lessess, successors and assigns, BUT IT IS HEREIN EXPRESSLY PROVIDED that the use of said portion of said street and avenue herein granted shall continue only so long as the said company, its lessees, successors and ssaigns, shall utilize the property adjoining a part thereof for street railway purposes.

SECTION IV.

The construction, maintenance and operaton of the railway siding or track herein provided for shall be subject to all of the several restrictions, condidtions and privileges set forth in Ordinance No. 157 of said Borough, approved January 18, 1904, granting unto said Company, its lessees, successors and assigns, certain rights and privileges, EXCEPT AS OTHERWISE HEREIN PROVIDED.

ORDAINED AND ENACTED into an ordinance this——day of October, 1909.

Attest:

President of Council.

Secretary.

Examined and approved by me this ——day of October, 1909.

Burgess.

Attest:

Clerk.

Ordinance No. 222.

An Ordinance vacating all that section of the street known as Lincoln avenue, comprising a part of what was formerly the township road and connecting said Lincoln avenue at or near the intersection of the borough of Charleroi and the borough of North Charleroi.

SECTION I.

BE IT ORDAINED AND ENACTED by the Burgess and Town Council of the Borough of Charleroi, Washington County, Pennsylvania, and IT IS HEREBY ORDAINED AND ENACTED by authority of the same:

That upon the passage of this ordinance, all that portion of the street or way situate in said Borough of Charleroi, being a part of what was formerly the Township road connecting Lincoln Avenue and McKean Avenue near the line of the Borough of Charleroi, bounded and described as follows:—BEGINNING at a point on the center line of Lincoln Avenue, as now located, said point being North 33 deg. 59 min. East, Thirty-three and Twelve Hundredths (33.12) feet from an angled point in the center line of said Lincoln Avenue, said angle point being One Hundred Fifteen and Fifteen Hundredths (115.15) feet from the intersection of the center line of Lincoln Avenue and the Northerly line of Thirteenth Street; thence North 3 deg. 10 min. West, Twenty-seven and Thirty-two Hundredths (27.32) feet to the Northerly side of Lincoln avenue; thence along Northerly side of Lincoln Avenue, North 33 deg. 59 min. East, Eighty-one and Twenty-seven Hundredths (81.27) feet to a point; thence South 25 deg. 22 min. East Thirty-eight and Thirty-sixth Hundredths (38.36) feet to the Southerly side of Lincoln Avenue; thence along Southerly side of said Lincoln Avenue, South 33 deg. 59 min. West, One Hundred Four and Thirty-five Hundredths (104.35) feet to a point; thence North 16 deg. 01 min. West, Two and Fifty Hundredths (2.50) feet to a point; thence North 3 deg. 10 min. West, Twenty-four and Fifteen Hundreths (24.15) feet to the place of beginning,—BE AND THE SAME HEREBY IS VACATED.

ORDAINED AND ENACTED into an ordinance this——day of October, 1909.

Eczema—A Germ Disease Can Now Be Cured.

The medical profession is all agreed that Eczema is a germ disease, but the thing that has baffled them is to find some remedy that will get to the germs and destroy them.

Zemo, the clean, external treatment, has solved this difficulty by drawing the germs to the surface of the skin and destroying the germ life that causes the diseases. The whole method of treatment and cure by Zemo is explained in an interesting booklet sent free by the manufacturers of Zemo. It tells how to cure yourself at home of Eczema, Blackheads, Pimples, Dandruff and all diseases of the skin and scalp. Call at Piper Bros. Drug Store for Booklet and learn more about this clean, simple remedy that is now recognized the standard treatment for all diseases of the skin and scalp.

The Way of Authors.

James Whitcomb Riley is evidently no believer in the greatness or enduring quality of modern literature. Some time ago a friend was talking to him about the good times that novelists of today have compared with those of the past.

"You modern writers don't work so hard," he said, "and you are paid twenty times as much as you ought to be."

Mr. Riley gently shook his head. "You labor under a misapprehension, my boy," he replied. "The chief difference between the old authors and those of today is simply this: They died and their works live; our works die and we live—as best we can."—Judge.

The Thieves of Canton.

Canton, China, at present is full of robbers. It is said that in some parts the people are really afraid to go to rest at night, inasmuch as it is certain that thieves will enter and rob the place. Accordingly some one sits up, while others sleep. The following is a queer criticism of China's police by a correspondent: "We have a police force whose work consists mostly in sleeping at post or helping the nearest shopkeeper to chop wood or a neighboring blacksmith to blow his fire."

An Anecdote of Verdi.

The first production of Verdi's opera "Othello" took place at Milan, and all the prominent musical critics of Europe foregathered in the Cathedral City in honor of the occasion. Among them was a Parisian journalist of wide reputation and admitted authority in the musical world. His first care on his arrival in Milan was to seek out Verdi and ask to be allowed to be present at one of the final rehearsals. The composer received him with extreme politeness, but replied that he could not possibly grant his request, as he had decided that the rehearsals were to be absolutely private, and he could not make an exception in the favor of any one journalist, however distinguished.

The Paris critic, far from pleased at this answer, protested that in these circumstances his account of the opera might not be all he should like it to be. "You see," he explained to the composer, who affected not quite to understand, "I shall have to telegraph my article the same evening. It will necessarily be hastily written, and the impression in Paris the next day may suffer in consequence."

But Verdi was more than equal to the occasion. "My dear sir," he made answer, "I do not write for 'the next day.'" The critic bowed himself out.

Soup Without a Spoon.

Soup without a spoon seems even harder to negotiate than meat without a fork, and we can sympathize with the complaint recorded in the diary of Felix Platter, a young Swiss, who went to Montpellier in 1552 in order to study medicine. He lodged in the house of his professor, Catelan, one of the greatest doctors of his time, and yet, writes Platter, "we were compelled to eat our stew in the usual French fashion—that is to say, picking the meat out with our fingers and then drinking the broth. In vain we begged our hostess to let us have spoons, but not a single one was to be found in the house, the only implement on the table being a large knife fastened with an iron chain. No one here seems to have ever heard of spoons, which we at home find so useful." Montaigne was astonished when he visited Switzerland in 1580 to find that "at all meals they put on the table as many spoons as there are people present."—Westminster Gazette.

About to Make a Change.

"What is he going to do now?" breathlessly asked the agitated young woman, with her eyes on the daring aeronaut who was clinging to his parachute.

"He is about to sever his connection with the balloon," replied her escort, "to accept a position a little lower down."—Exchange.

Better, Healthier Women

are known to exist in this country by thousands because freed from pain and suffering by Lydia E. Pinkham's Vegetable Compound.

Could such a record be made without actual and superior merit? Read what this woman says, and realize that the results secured in her case could not have been made except by a very good medicine.

Lawrence, Kans. — "I was a great sufferer from a weakness, bles, which caused a weak and broken-down condition of the system. My side was so sore I could not lie on it. I saw in my daily paper that Lydia E. Pinkham's Vegetable Compound was good for all female troubles and had done so much for other suffering women, so I felt sure it would help me, and it has helped me wonderfully. I got relief from the first bottle. My aches and pains all left me and as I continued taking the Compound I grew stronger. Within three months I was a perfectly well woman, and I want this letter made public to show what benefits women may derive from Lydia E. Pinkham's Vegetable Compound."—Mrs. Julia A. Snow, Route No. 8, Lawrence, Kans.

Science in surgery and electricity has advanced much in the past 30 years, but the treatment of disease by the old fashioned roots and herbs method has never been improved upon. The fact that this leader of them all—**Lydia E. Pinkham's Vegetable Compound**—is to-day the largest seller of any similar medicine in the world, is proof positive of its value and superiority, for with all our enterprise and advertising we could not keep fooling the people for 30 years. Merit and merit alone is what has made Lydia E. Pinkham's Vegetable Compound the standard medicine for treating diseases peculiar to women.

For 30 years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for female ills. No sick woman does justice to herself who will not try this famous medicine. Made exclusively from roots and herbs, and has thousands of cures to its credit.

If the slightest trouble appears which you do not understand, write to Mrs. Pinkham at Lynn, Mass., for her advice—it is free and always helpful.

How often do you eat this food?

A short time ago there appeared in the columns of one of the prominent magazines an article on building brain and muscle by the proper selection of the foods you eat.

A good many people were surprised to find oatmeal placed at the top of the list of foods recommended; but if the article had appeared in an English or Scotch paper every reader would have expected to see first place given to good oatmeal.

As a matter of fact Great Britian and Europe come to us for tremendous quantities of Quaker Oats because it represents to them perfect food, being the richest in flavor and best in cleanliness and purity, of all oatmeals.

Convenience and economy are served by the way it is packed—regular size 10c packages and large size family packages, 25c. 55

A GOOD DINNER

Business men will find our Restaurant a good place to dine.

The food we serve is the best the market supplies; cooked to the liking of our patrons and served with neatness and dispatch. The surroundings and accessories are such as will add to the relish of the meal and insure satisfaction to the most exacting epicure.

Meals a la carte or regular.

Dairy Lunch and Cafe

THE HORSE.

He Is So Stupid That He Can Be Taught Any Habit.

There have been on exhibition at various times horses that are apparently prodigies of mathematical insight—that can do anything with numbers that the trainer can do. Yet we absolutely know that no animal can so much as count at all. Furthermore, it is always the horse that performs these marvels, though the horse is the most utterly stupid of all the dumb creatures that man has made his friends.

That is precisely why the horse is always taken to be made into an arithmetician. He is so stupid that he can be taught anything—any habit, that is—and, having no mind to be taken up with his own affairs, can be relied on to do exactly as he is told.

All these arithmetical fakes, whatever their details, are worked in essentially the same way. The horse is taught, by endless repetitions, some mechanical habit. A given signal, and he begins to paw the floor. Another signal, and he stops. Press the proper button, and he takes a sponge and rubs it over a certain spot on a blackboard or picks up a card lying in a certain position. That is all he does. The meaning of the act exists for the spectator only. The pawings count the answer to a problem in addition, the card bears the reply to a question, but the horse does not know it. He merely follows a blind habit, just as he will stop when you say "Whoa!" though you interpolate the word into your recitation of the Declaration of Independence.—McClure's Magazine.

Facts Worth Knowing.

There are 2,754 languages.

Envelopes were first used in 1839.

Telescopes were invented in 1590.

The first steel pen was made in 1830.

Watches were first constructed in 1476.

The first iron steamship was built in 1830.

The first lucifer match was made in 1829.

Gold was discovered in California in 1848.

Coaches were first used in England in 1569.

Modern needles first came into use in 1545.

Kerosene was first used for lighting purposes in 1826.—Philadelphia Ledger.

THE DIAMOND CUTTER.

His Skill Has Much to Do With the Brilliancy of the Gem.

When the expert looks at a diamond he can tell you in a moment where it came from and even whether it was cut lately or some years ago. He knows by its color whence it comes, for the color of the Brazilian diamond differs from that of the South African, and even in South Africa different colors are found in different mines.

In the rough the diamond has little brilliancy, for there is a crust that must be cut away before it can properly refract the light, and it is this power of refraction which makes the brilliancy of a diamond and has everything to do with its value in the market. The skill of the diamond cutter has much to do with bringing out this brilliancy. He must do the most he can with the rough stone before him and lose as little as possible of the precious weight in the stone.

Diamonds are found in all kinds of queer shapes, for the carbon may be in any position while being crystallized, and the act of crystallization may affect only parts of that carbon. When the expert cutter has a rough diamond before him he judges almost instantly how it will cut to the greatest advantage. If it inclines to the pear shape he will make a pear shaped diamond of it. If it be square or round the cutting will folow the natural lines as closely as possible, so that the loss may be reduced to a minimum.

To make the stone as brilliant as possible the diamond cutter cuts many facets so as to refract the light from as many points as he can. A full cut brilliant has at least forty-eight facets, and so expert are the cutters that they often cut diamonds so small that it requires a hundred to weigh a carat. Each has forty-eight facets.—Cleveland Plain Dealer.

Recipe For Goodness.

Half of the wickedness of life is owing to misery. Make a man happy and he is good. He revives like a flower refreshed by the dew of heaven; he becomes sanguine, enthusiastic, energetic.—London Graphic.

Loving hearts are like poor folks—they are contented with whatever is given to them.—Swetchine.

Sensitive Tobacco Plants.

In Cuba the best tobacco comes from one strip of land only, the slopes of a certain river, and even there a north wind may ruin the crop. Tobacco is the most sensitive plant we know of. The smallest thing affects its flavor. Plant Virginia tobacco in Germany and the result is a better tobacco, but it is German tobacco, not Virginian. In north Borneo they produce the most delicate and silky leaves that ever were seen, but the tobacco lacks character and taste. Send Havana seeds to the Philippines, and you merely produce a smoother Manila.—Cleveland Plain Dealer.

Homemade Names.

"That little girl," remarked the druggist to the doctor, "was just in for 10 cents' worth of tincture of benzine. But I've had it before and gave her benzoin."

"That was easy," answered the doctor. "This morning on a diphtheria case the woman wanted to know if I administered antitoxin with an epidemic syringe."—New York Press.

Just the Opposite.

"When I first met you," cried the woman who had been married for her money, "you occupied a low, menial position, but now, thanks to me, your position"—

"Is a hymeneal one," her husband interrupted.

A Reflection.

"To my annoyance," she said, "I found he had a lock of my hair. How he got it I can't imagine."

The older girl smiled oddly.

"When you were out of the room, perhaps?" she hazarded.—Cincinnati Enquirer.

Literary Analysis.

"Shakespeare's works are marvelous revelations of poetry."

"Poetry!" echoed the Baconian scornfully. "They are merely a collection of ciphers, with some figures of speech thrown in to make them harder."—Washington Star.

His Wise Plan.

"I never have any luck."

"Neither do I," responded the other citizen. "Therefore I keep out of enterprises requiring gobs of luck to be a success."—Louisville Courier-Journal.

THE RUSSIAN MODEL

By EDMOND COMPTON.

[Copyright, 1909, by American Press Association.]

Spencer Fiske at twenty-one, though the possessor of a fortune, did not propose to lead an idle life. He laid out a European trip for himself to last one year, at the end of which time he would return, spend three years in the study of the law, after which he would practice the profession for the rest of the period allotted him on earth. The most practical part of his scheme was to marry at the time he began his work. He believed in marriage as necessary to a complete life and that it should be entered upon with one's judgment well in hand—not dazed by the glamour of the senses.

Six months after forming his plan he found himself one summer morning in St. Petersburg dawdling through a picture gallery, when he came upon a painting the subject of which was a village festival in Russian rural life. The central figure was a girl apparently about fifteen, with beautiful blue eyes, light hair and a delicious smile on two lips nestling between dimples.

Fiske gazed long on the scene, taking it in as a whole and in part, his eyes always returning to the central figure. He went to other rooms, but returned before leaving the gallery to gaze upon the laughing face of innocence. Nor was this all; he returned every day for a week—sometimes twice a day, each time to gaze upon the face that charmed him. One day while thus engaged a man stepped up to him and said in French:

"You seem pleased with my work."

"Your work?"

"Yes; I painted it."

"Where did you find your model for the central figure?"

"In Siberia. I am a traveler as well as painter. I found her in a small village. She is the daughter of a peasant."

A week later Fiske was on a train bound for Siberia. A desire to see the original of the festival scene had taken possession of him, and he saw no reason why it should not be gratified. Reaching the village, he sought the girl and found her in a dooryard spinning. She had grown a year older than when the picture was painted, with a slight budding of her beauty. Fiske knew only a few phrases of Russian, but they sufficed to convey to her the information that he had seen her face on canvas and had come to view the original.

However practical a young man may be, there is one thing about which he is usually stupidly impractical—a young girl's heart. Fiske was insensible to the effect his statement was likely to produce. He was even more stupid than this. He did not know that he had fallen in love with a pretty face. But he found it out all on a sudden, for the girl told him that he had arrived in time to see her married. There was in this wireless message something like the clutching of cold fingers about his heart. With his lips he told her that he was fortunate; with his eyes he told her that he had met with a sudden disappointment. Then she told him that the match had been arranged by her parents.

A few days later he went to view the ceremony. He found the bride in a tent surrounded by her girl friends. On asking where was the groom he was told that he would soon appear, and it was further explained that as soon as the bride saw him she would run away. The groom would follow and must catch her before he could be permitted to marry her. This was the custom in that part of Siberia.

Presently a young man was seen approaching. The girls told the bride that the groom was coming and, leaving the tent, she ran like a fawn to elude him. The man found himself tripped and balked at every turn. Fiske in order to get a better view went up on to a rise in the ground. The girl was giving her intended mate a hard run. The American looked on with a wildly throbbing pulse, and once when the lover was about to grasp the prize his heart stood still. With a quick turn she avoided her pursuer and came running toward the point where Fiske was standing. As she passed him she looked at him. What her eyes said no one except the two knew, but they must have said something of importance, for Fiske gave a quick turn, advanced a few steps, stopped, then suddenly started after the beautiful fugitive.

There was a clamor among the lookers-on, but the American did not hear it. The groom, seeing another chasing his bride, stopped a moment in wonder, then went on as if a fury was spurring him. The girl looked back and, seeing herself doubly pursued, sped on as if on the wings of the wind. One would have thought she sought to elude them both. Fiske, being the fresher of the two, soon gained. Then when the girl saw that he led she lagged and in a few minutes more dropped into his arms.

Thus it was that Spencer Fiske, who had laid out a life plan in which marriage was to be entered upon with circumspection, found himself the possessor of a Russian peasant girl whom he had caught in a race with the man to whom she was betrothed.

The pair were at once surrounded by several hundred people, all talking at once, the father of the girl more furiously than all the rest. The intended groom disappeared. Finally an interpreter was secured, and Fiske proposed that the girl be sent to school for three years at his expense. The proposition was accepted, and at the end of the term he married her at the time he had intended taking a wife on the common sense plan.

Notice to the Public

According to our court's ruling we have discontinued solicitors. All persons wishing beer, will call at the Charleroi Brewery, or send order and money by mail, and the order will be promptly delivered.

A CONTINGENT ASSET.

The Court Didn't Appoint a Receiver to Administer It.

A woman's way of getting around trouble, especially her ability to answer a question without giving any information is well known, particularly to the members of the bar that have had occasion to cross words with her on the stand A woman with a well developed sense of humor once foiled the persistent attempt of W G. Chapin, late editor of the American Lawyer, to elicit information in supplementary proceedings He tells the story of the failure himself

"I had been admitted to the bar but a short time and was a fair specimen of the average theory stuffed, practice wanting, law school graduate How joyously were the commands of the managing clerk obeyed! Here was the looked for opportunity to demonstrate my ability in the noble art of searchingly examining a recalcitrant witness, a woman!

"Of the two, I fancy, however, that it was the lady who was more self possessed when the proceedings opened. She was a dressmaker and had been sued for debt by a dry goods firm The examination dragged its slow length along revealing no assets, until finally came the omnium gatherum query asked as a finisher.

"'Have you any property of any kind or nature, real or personal, or any right or interest in property that you have failed to mention?'

"'Perhaps it was my tone she disliked. At any rate, her eyes snapped 'Well, I've got what perhaps you wouldn't call an interest, but it's almost as good. It's an expectation Must I answer?'

"'If you please' I was encouraged

"'Well, you see, it's this way. I've got two sisters, and both of 'em have married finely. Now, neither one of them begins to be as good looking as I am'

"'Yes.' She had me puzzled.

"'Well I really don't see why I shouldn't have the same show'

"It is needless to say that there was no receiver appointed to administer this 'asset'"—Chicago Record-Herald.

A CONFIDING CONSTABLE.

The Way He Helped the Housemaid Repel the Burglars.

A good story is told at the expense of a constable in rural England, says a writer in the London Telegraph.

Not long ago a young and pretty housemaid arrived at the big house of the neighborhood, and it was observed that our friend's beat often took him in that direction At first she seemed to resent his advances, but suddenly she changed altogether, and the course of true love appeared to run smooth—for a time.

One night he called rather later than usual. It was dark, and his fair one greeted him somewhat coolly, he thought.

His doubts, however, disappeared when she suddenly declared that she would take him into her confidence She had overheard the particulars of a plot to break into the house and steal the plate.

"Now, Jim," she said, "here's a chance for promotion. The burglars knew where the plate was kept, so we're shifted it. What I want you to do is to get into the plate cupboard and wait till they come and open the door Then you'll have 'em."

Jim jumped at the chance and half an hour later was concealed in the cupboard. The burglars came, as expected, and promptly got to work

The constable chuckled to himself as he heard the muffled whir of a tool on the outside of the cupboard door, and he grasped his staff and waited.

After some minutes' waiting he resolved to take a cautious peep. But the door was fast, securely screwed on the outside by the burglars

When Jim eventually roused the house and was released from his prison the burglars and plate, together with the pretty housemaid (a confederate), had disappeared Moreover, the constable's position took a good deal of explaining away.

IT CAME TRUE.

The Large Party and the Calamity That Followed.

"You can't make me believe," Uncle Abner Jarvis was saying, "that there isn't something in fortune telling"

His auditors were grouped round the stove in the corner grocery store "Ever have any experience with it?" asked one of them.

"That's what I was going to tell you,' resumed Uncle Abner. "Once when I was at the county fair I saw a little tent with a sign on the outside of it that said Mme Somebody-or-other would tell your fortune for 25 cents I stepped inside just for fun

"A woman with a thick veil over her face was sitting in a chair on a raised platform I gave her a quarter, and she looked at my hand One of the things she told me was that I was going to have a large party at my house in less than a month and that it would be followed by a calamity

"I laughed at that Thinks I to myself, 'We hain't had any parties of any kind to our house for two years, and I don't reckon we'll have one quite as soon as that.'

"But it did come true. In about two weeks my wife's Aunt Jane came to visit us, and if you think she ain't a large party you ought to see her She weighs 287 pounds"

"But how about the calamity?" inquired the man who was sitting on the nail keg after a long pause.

"Well," said Uncle Abner slowly, "she broke down our spare bed the first night she slept in it."—Youth's Companion.

Moderate Priced Shoes

This House of Good Shoes places great stress on its lines of Women's moderate priced Footwear.

Good shoes at good prices can always be had, but good shoes at very moderate prices is another proposition.

We call special attention to our High and Low cut shoes at such easy prices as

$1.50, $2.00, $2.50, to $3.00

We pay extra money to have our lines of Shoes, at these moderate figures, extra good. The styles are the same as shown in the higher priced footwear. The leathers are good and the workmanship is excellent.

In high cut shoes there are button, lace, and blucher styles, in different lasts, toe widths, heights of heel, etc.

In low cut shoes, there are stylish oxfords, lace or button, ankle straps, etc. Black or tan leathers.

We show the best moderate priced Shoes for women on the market.

THEY INJURE CHILDREN

Ordinary Cathartics and Pills and Harsh Physic Cause Distressing Complaints

You cannot be over-careful in the selection of medicine for children. Only the very gentlest bowel medicine should ever be given except in emergency cases. Ordinary pills, cathartics and purgatives are apt to do more harm than good They cause griping, nausea and other distressing after-effects that are frequently health destroying and a life lasting annoyance.

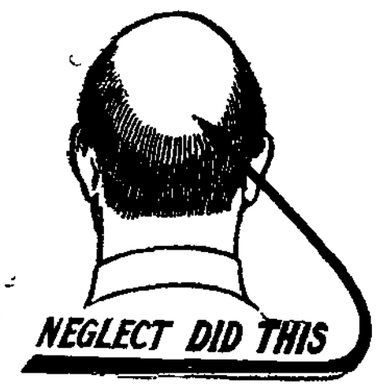
We personally recommend and guarantee Rexall Orderlies as the safest and most dependable remedy for constipation and associate bowel disorders. We have such absolute faith in the virtues of this remedy that we sell it on our guarantee of money back in every instance where it fails to give entire satisfaction and we urge all in need of such medicine to try it at our risk.

Rexall Orderlies contain an entirely new ingredient which is odorless, tasteless and colorless. As an active agent, it embraces the valuable qualities of the best known intestinal regulator tonics.

Rexall Orderlies are eaten like candy. They are particularly prompt and agreeable in action, may be taken at any time, day or night; do not cause diarrhoea, nausea, griping, excessive looseness or other undesirable effects. They have very natural action upon the glands and organs with which they come in contact, act as a positive and regulative tonic upon the relaxed muscular coat of the bowels and its dry mucous lining, remove irritation, overcome weakness, tone and strengthen the nerves and muscles and restore the bowels and associate organs to more vigorous and healthy activity.

Rexall Orderlies completely relieve constipation, except when of a surgical character. They also tend to overcome the necessity of constantly taking laxatives to keep the bowels in normal condition.

There is really no medicine for this purpose so good as Rexall Orderlies, especially for children, aged and delicate persons. They are prepared in tablet form in two sizes of packages: 12 tablets 10 cents, and 86 tablets 25 cents. Remember you can obtain Rexall Remedies in Charleroi only at our store—The Rexall Store. John W. Carroll.



Don't wait till you have a shiny bald head before using Woodbury's Hair Tonic, for nothing will make the hair grow when the roots have died. But when life remains Woodbury's Hair Tonic invigorates the scalp and brings new life and strength to the hair follicle. It stimulates the growth of the hair and makes it beautiful and abundant.

Woodbury's

COMBINATION

Hair Tonic

If you don't see Woodbury's Face on the label, it's an imitation.

is the only hair preparation made from the formula of a dermatologist, and the unlimited experience of the specialists at the famous Woodbury Institute stands back of every bottle.

Two Sizes—25c. and $1.00

If your scalp is dry or oily, scaly or irritated or shows other signs of disease ask about Woodbury's Combination Treatment for the Hair and Scalp
